FOREWORD

India has a rich tradition of nurturing the holistic development of children during their most formative years. These traditions provide for complementary roles for the immediate family, the extended family, the community, and formal institutions of care and learning. In addressing the first eight years of a child's life, this holistic approach — which includes the cultivation of *sanskar* which are passed on from generation to generation — has a critical and positive lifelong influence on every aspect of a child's growth, health, behaviour, and cognitive capabilities in the later years.

Considering the importance of the early years in a child's lifelong development, the National Education Policy 2020 (NEP 2020) envisioned a 5+3+3+4 curricular and pedagogical structure as providing a much needed focus on formal education and childcare in the country during the first five years corresponding to ages 3-8, naming it the Foundational Stage. Classes 1 and 2 form an integral part of this Foundational Stage, continuing from the ages of 3-6 years, in which a child's holistic growth is taken care of in *Balvatika*. An individual's lifelong learning, social and emotional behaviour, and overall health depend deeply upon the experiences gained during this critical Foundational Stage.

The Policy thus recommended developing a National Curriculum Framework specifically for this Stage, which would comprehensively guide the whole education system toward providing high-quality education in children's early years, thereby carrying this momentum forward to the other later stages of school education. Based on the principles and objectives enunciated under NEP 2020 — as well as on research from a range of disciplines (including neuroscience and early childhood education), on experiences and accumulated knowledge from the ground, and on the aspirations and goals of our Nation — the National Curriculum Framework for Foundational Stage (NCF-FS) was developed and released on 22 October 2022. Subsequently, textbooks have been developed to bring to life the curricular approach of the NCF-FS. The textbooks attempt to connect to the children's real life by recognising their learning in the classroom and the significant learning resources in the family and the community.

The approach in the NCF-FS is also resonant with the *Panchkoshiya Vikas* (the development of the five sheaths of human personality) as elucidated in the *Taittiriya Upanishad*. The NCF-FS enunciates the five domains of learning, i.e., physical and motor; socio-emotional; cognitive; language and literacy; and cultural and aesthetic, which map to the

Indian tradition of *Panchkosh* consisting of five *kosh* viz. *Annamaya*, *Pranmaya*, *Manomaya*, *Vijnanmaya* and *Anandmaya*. Besides, it also focuses on integrating a child's experiences at home with the knowledge, skills, and attitudes that would be developed within the school's precinct.

The NCF-FS, which covers Classes 1 and 2, also articulates a play-based approach to learning. According to this approach, books form an essential part of the learning process; however, it is also important to understand that books are only one among many pedagogical tools and methods, including activities, toys, games, conversation, discussion, and more. This marks a departure from the prevailing system of merely learning from books to a more congenial play-way and competency-based learning system, where children's engagement with what they do and learn becomes critical. Thus, the book in hand must be seen as an instrument to promote a play-based pedagogical approach in its entirety for this age group of children.

The present textbook attempts to provide competency-based content in a simple, interesting, and engaging manner. The endeavour has been to make it inclusive and progressive by breaking several stereotypes through the presentation of text and illustrations. The child's local context, which includes traditions, culture, language usage, and rootedness in India and is central to students' holistic development, has been reflected in the books. An effort has been made to make it engaging and joyful for the child. The book integrates art and craft to help children appreciate the aesthetic sense inherent in such activities. The textbook provides children with situational awareness to understand the underlying concepts relating to them in their own contexts. Though light in terms of content, this textbook is rich in substance, providing varied experiences and integrating play-way methods of learning through toys, games, and a variety of other activities. It includes questions that will help children develop critical thinking and problem-solving abilities. Besides, the textbook has rich subject matter and activities to help children develop the necessary sensitivity towards our environment. It also provides ample scope for our States/UTs to add/adapt content with local perspectives in the versions that they may develop as per the recommendations of NEP 2020.

NCERT appreciates the hard work done by the committee set up to develop the syllabus and learning-teaching material for the foundational stage. I thank the Chairperson of this committee, Professor Shashikala Wanjari, and all other members for completing this task in time and in such an admirable way. I am also thankful to all the institutions and organisations which have generously extended their help and assistance in making this possible. I am especially thankful to Dr. K. Kasturirangan, Chairperson of the National Steering Committee, and its other members, including those of the Mandate Group, its Chairperson Professor Manjul Bhargava, and members of the Review Committee, for their timely and valuable suggestions.

Reprint 2024-25

As an organisation committed to reforming school education in Bharat and continuously improving the quality of all learning and teaching material that it develops, NCERT looks forward to critical comments and suggestions from all its stakeholders to further improve upon this textbook.

About the Book

The National Policy on Education 2020 has recognised the importance of developing a strong foundation of learning during the early developmental age (3–8 years) of children emphasising on foundational literacy and numeracy. In view of policy's perspective of holistic development of children, the *National Curriculum Framework for Foundational Stage 2022* (*NCF-FS 2022*) has recommended curricular goals, competencies and learning outcomes aligned to developmental domains such as physical, socio-emotional-ethical, cognitive, language and literacy, aesthetic and cultural and positive learning habits. As a follow-up of this, syllabus for foundational stage developed by the NCERT includes mathematics and numeracy under the cognitive domain, also emphasising upon integration of all other domains while developing learning-teaching materials for mathematics including textbooks.

The present textbook of Mathematics for Class 2 named as *Joyful Mathematics* has been designed keeping in view the recommendations of *NEP 2020*, *NCF-FS 2022* and Syllabus for the Foundational Stage. Though it may be assumed that a child entering Class 2 has intervention in the form of Balvatika 1 to 3 and Class 1 (age 3–8 years), yet in view of the diversity in our country, there may be children who have got exposure of numeracy in the institutional setup in Class 1 only. This textbook takes care of such situations.

Children at this stage enjoy free play, toys and games. Therefore, plenty of opportunities are included for play and games within activities while developing various mathematical ideas like spatial understanding, handling numbers, mathematical and computational thinking, etc. This helps the child in smooth transition from concrete to pictorial and to abstract reasoning for every new concept or competence being introduced.

The *Joyful Mathematics* for Class 2, has a lot of activities which are expected to be conducted within and outside the classroom, keeping in view the objective of experiential learning for holistic development. In all the chapters, mathematical understanding is built through play-based activities. The textbook tries to provide children a feeling that they are playing, and mathematics is being

learnt, rather than forcing them to learn mathematics without any joy.

The learning of languages and age-appropriate physical and mental development have been integrated with the book as learning of mathematics does not take place in isolation. The book provides suggestions to parents, teachers or other concerned like elder siblings on having a healthy discussion with children through thought provoking questions, stories, poems, etc.

Various mathematical ideas have been presented through self-explanatory and contextual illustrations keeping in view the differential abilities among children to read words at this stage. Moreover, such pictures and illustrations also help the children in enhancing their visual and reading comprehension.

The book is designed as text-cum-workbook that includes opportunities for children to draw pictures, colour them and write appropriately. The oral discussions with children have been included in all the chapters to help them to verbalise and express their thinking process. This will also help teachers to continuously assess the learning in a non-threatening manner. The thought provoking practice tasks in the form of questions and activities have been given in this textbook. It is also expected that the teachers and parents will develop similar questions for the children to have more targeted skill practice. The innovative use of the textbook lies with the parents and teachers and that will ensure the joyful learning of mathematics among children of Class 2.

This book emphasise on inculcating logical thinking, analytical skills, mathematical communication and 21st century skills through activities, open ended questions, exploration and discussion in the book. The chapters are framed as a beginning towards mathematical proficiency by adding conceptual understanding, procedural fluency, adaptive reasoning, and a positive attitude towards mathematics.

The content in *Joyful Mathematics* for Class 2 is based on the four blocks mentioned in the *NCF-FS 2022*. These are — Oral math talk, Skills teaching, Skill practice and Math games have been included in all the chapters. Most of them have been presented in an integrated manner. However, one can find the following chapters not only aligned to the curricular goal (CG-8) of developing mathematical understanding and abilities to recognise the world through quantities, shapes and measures but also to all other curricular goals as given in *NCF-FS 2022* and syllabus leading to holistic development:

Oral Math Talk: This includes discussion on mathematical concepts through poems, picture stories and activities as mentioned below:

- Maths poems like 'Seasons' and 'East, West, North or South' in Chapter 9.

Reprint 2024-25

- Picture stories for the introduction of concepts, practice and assessment have been included like 'Heena' and 'Aatif' in Chapter 2, 'Shadow Story' and 'Hide and Seek' in Chapter 4, 'Decorating with Garlands' in Chapter 6, 'Rani's Gift' and 'Pumpkin's Chaupal' in Chapter 7, etc.
- Discussion with children through various daily life contexts like, 'Vallam Kali' on Chapter 1, 'Garba Festival' in Chapter 2, 'Decoration for Festival', 'Let us Count Diyas' in Chapter 6, 'Fruits in the Park' in Chapter 7, 'Let us Share' and 'How many Groups' in Chapter 8, 'Gargi's Day' in Chapter 9, 'Picnic Time', and 'Games we Play' in Chapter 11.

Skill Teaching: All Chapters have activities that can be done by the child all alone, in groups, or with the help of elders (parents, teachers, and siblings). This helps the child in the development of various skills with the guided support of others.

Skill Practice: Opportunities for skill practice have been included in all the chapters in the form of Let us Do, Project Work, and practice questions. For example, 'Origami Fun', 'Mehandi' and 'Stamping' in Chapter 4 and 'Make your Own Balance' in Chapter 7.

Math Games: Math games and activities have been interwoven in all the chapters throughout the book. For example, 'Let us Make 100', 'Mark by Passing the Path' and 'Flash Card Game' in Chapter 1; 'Patterns in Number Chart' in Chapter 3; '*Yoga asanas*' and 'Let us Play with Dots' in Chapter 5; 'Choose the Longest Path' and 'How Many Blocks?' in Chapter 7; 'How Old are We?' in Chapter 9.

The above chapters have been developed keeping in view the need for developing sensitivity towards environment, values, positive habits, cultural rootedness, and inclusive perspectives in children. Multilingual perspective is also reflected in the textbook. Engaging activities also focusing on language development are included in the entire textbook which will trigger interest in children to learn joyfully.

Teachers need to understand the objective of each of the chapters and activities given, their alignment with the curricular goals and competencies as included in the syllabus for the foundational stage, and accordingly make a learning plan for children including a variety of activities addressing the diverse needs of children. In this learning plan, teachers need to be the active observants of learning outcomes achieved by the children and their flow towards the development of identified competencies under all the curricular goals. Mapping with learning outcomes and activities given in different chapters is required on the part of teachers if we want to make our education competency-based in true letter and spirit.

Activities given in this textbook are suggestive. Teachers can develop their own activities and supplement the same with local toys, games or toys created by them and other materials available

Reprint 2024-25

in the child's immediate environment for hands-on learning with concrete material. Teachers are free to adapt, adopt and modify the activities as per their contexts and circumstances without losing the sight and aim of the development of identified competencies in children at this stage.

Mental challenge and engagement in thought provoking tasks lead to better mathematical learning and criticality. Solving brain teasers, puzzles and riddles provide opportunities to children in addition to their routine learning. Many age appropriate puzzles have been given in the book. The child must be engaged for at least a week in finding the solutions of a puzzle. There may be more than one right answer for some of the problems. Also these puzzles are given to provide joyful experiences to a child. Thus, child should not be assessed on the basis of solving these puzzles.

The chapters of the book need to be supplemented by audio-video aids, e-content, material available in the QR codes embedded in the book and other learning-teaching material like educational kits developed by the NCERT.

This textbook is not the only source of learning. Children learn much more while observing the environment; talking to peers and elders including grandparents; making things of their interest; watching TV; playing with mobile; toys and games; listening stories and poems; doing projects; visiting places of cultural importance and traveling. Therefore, we as teachers or parents need to value this learning by going beyond the textbook and try to map it with the competencies and curricular goals identified for this stage. The education of our children is seen as our collective responsibility.

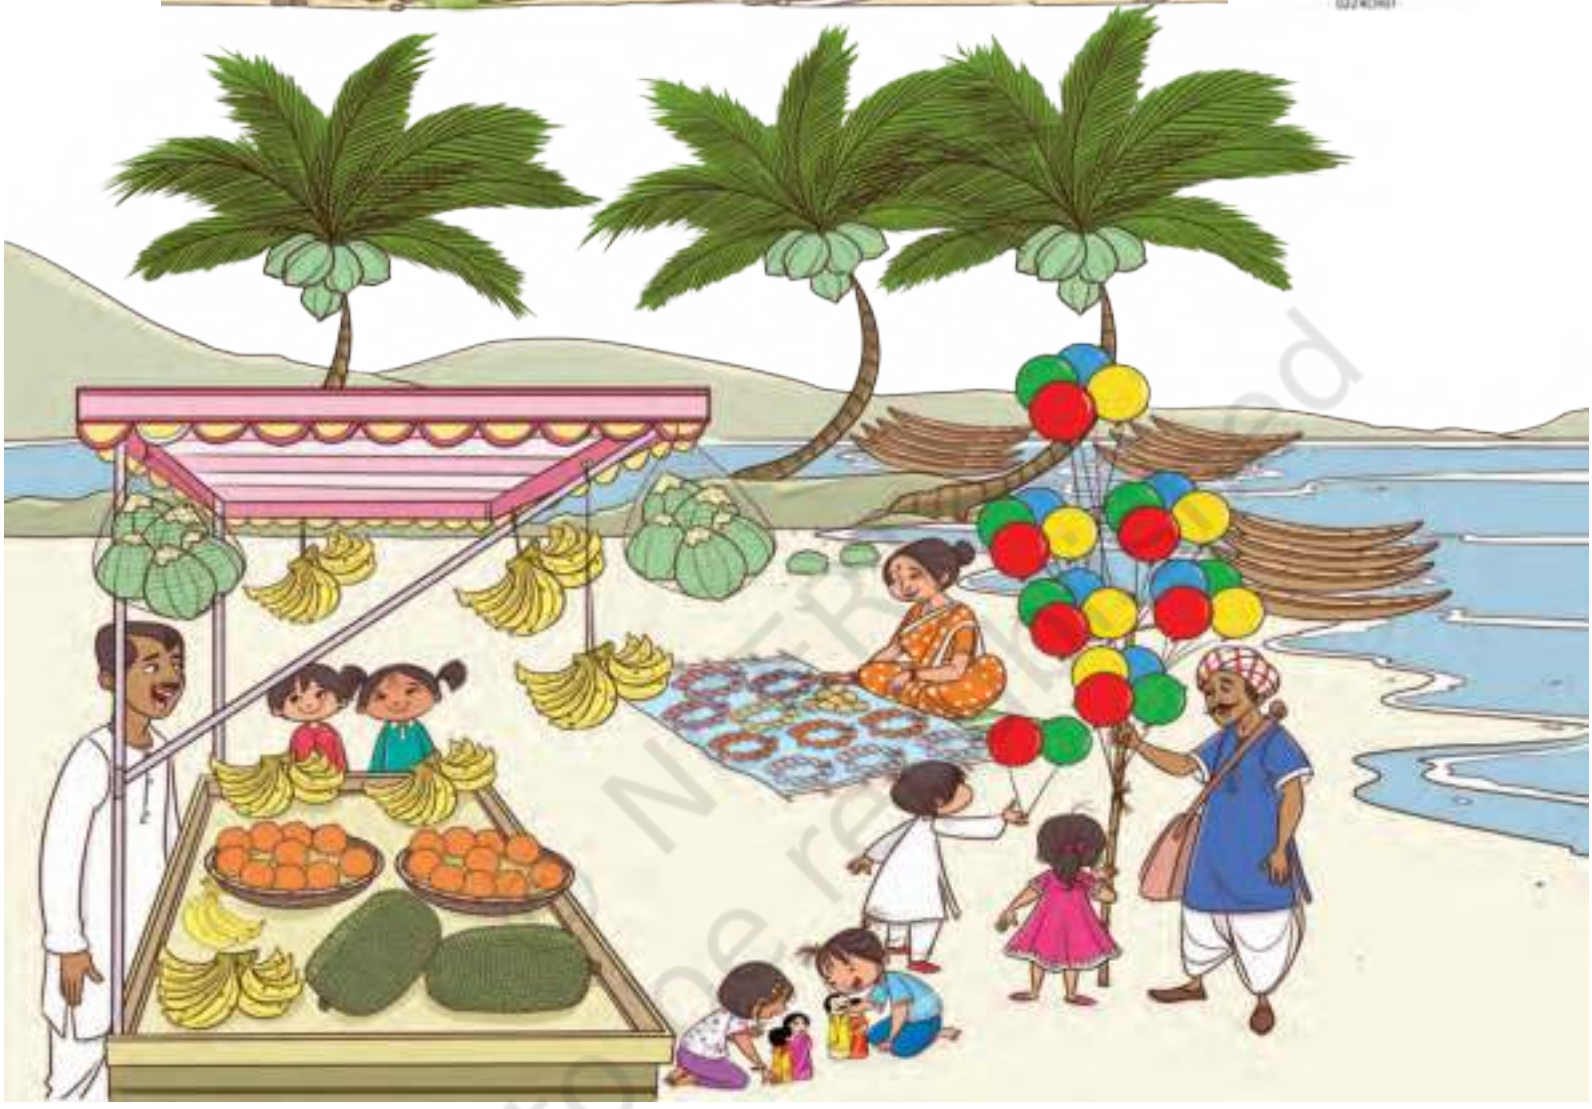
1 A Day at the Beach



Look at the above picture. Count and write the number of objects given below.

Coconuts _____ Boats _____

Children _____ Oranges _____

How did you count them? Did you count them one by one or in bunches or groups?

Discuss with children if they have seen or visited a seashore or a river side. Which animals and plants are usually seen there? Encourage them to count in groups.

Let us Do

A. Look at the shops shown in the picture and fill in the blanks.

i. There are _____ necklaces of shells with 10 shells in each necklace.

ii. There are _____ groups of balloons with _____ balloons in each group and _____ loose balloons.

iii. There are _____ bunches of bananas with _____ bananas in each bunch and _____ loose bananas.

B. Surbhi has collected some seashells. She wants to help her mother in making bracelets and necklaces.

C. Surbhi has made _____ groups of shells with _____ number of shells in each group for her bracelets.

D. Her mother has made _____ groups of shells with _____ number of shells in each group for her necklaces.

Try the tongue twister.

"She sells seashells at the seashore."

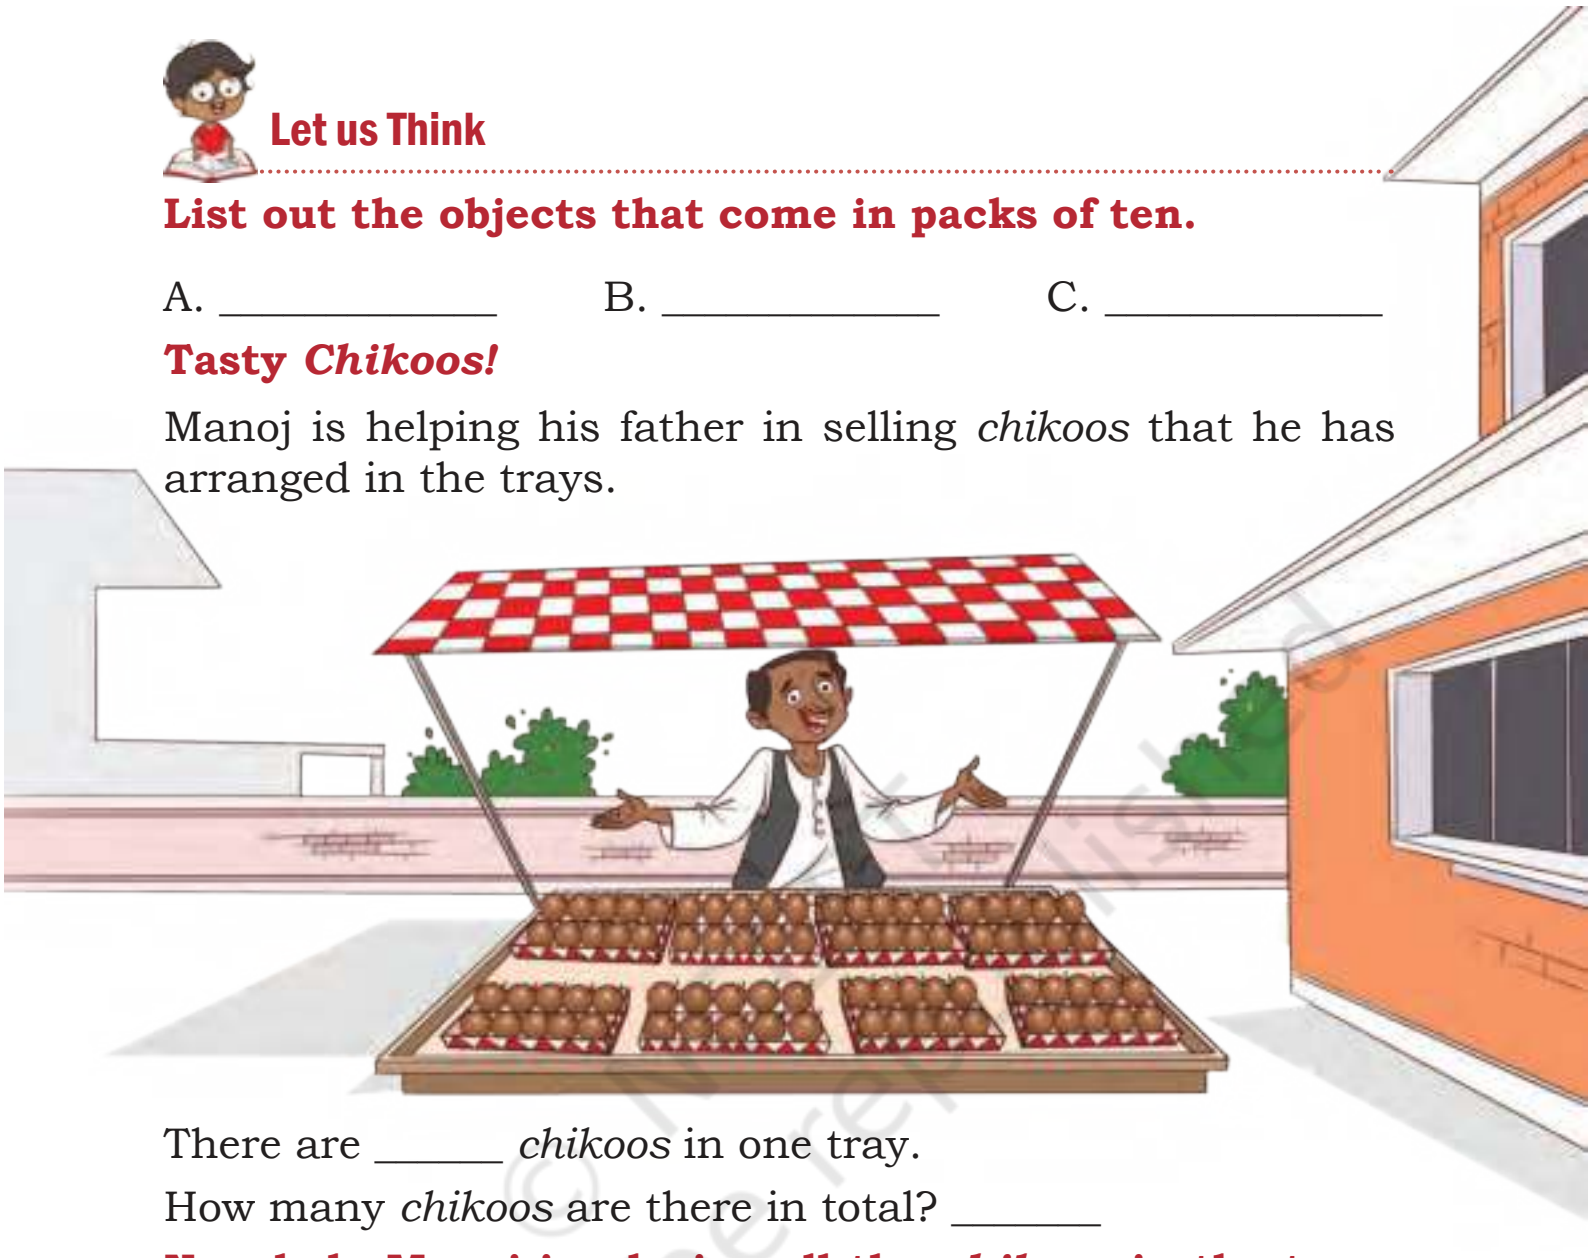
Let us Think

List out the objects that come in packs of ten.

A. _____ B. _____ C. _____

Tasty *Chikoos!*

Manoj is helping his father in selling *chikoos* that he has arranged in the trays.



There are _____ *chikoos* in one tray.

How many *chikoos* are there in total? _____

Now help Manoj in placing all the *chikoos* in the trays for selling.

A. 25 *chikoos*  : ____ trays of ten *chikoos* and ____ *chikoos*.

B. 43 *chikoos*  : ____ trays of ten *chikoos* and ____ *chikoos*.

C. 35 *chikoos*  : ____ trays of ten *chikoos* and ____ *chikoos*.

D. 58 *chikoos*  : ____ trays of ten *chikoos* and ____ *chikoos*.

Reprint 2024-25

Let us Match

A. 80 *chikoos*

B. 72 *chikoos*

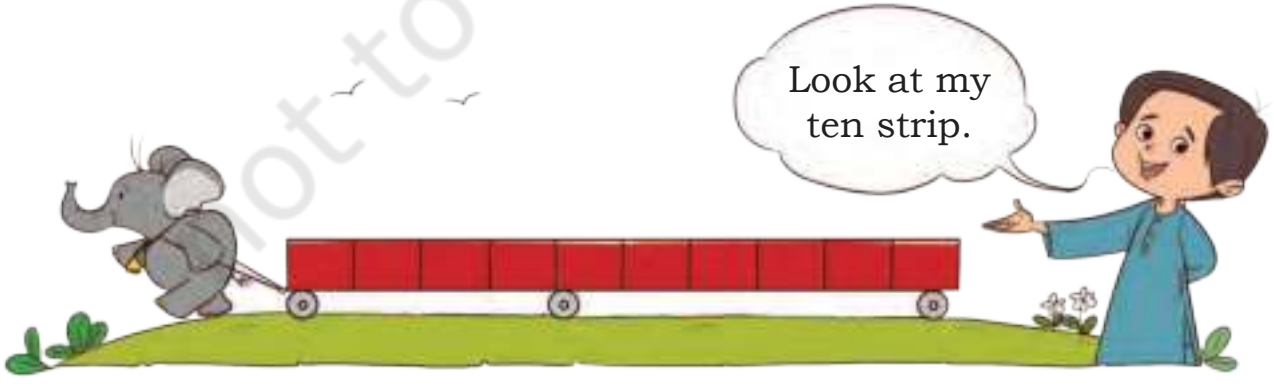
C. 56 *chikoos*

D. 28 *chikoos*

Fun with Blocks and Strips

Can you tell how many blocks are there in this block stick?

1 block stick = _____ blocks

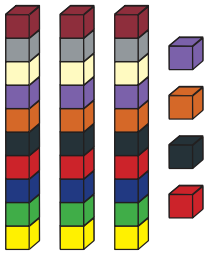


Can you tell how many units are there in this ten strip?

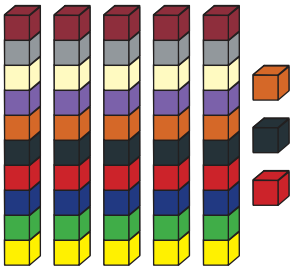
1 ten strip = _____ units

Reprint 2024-25

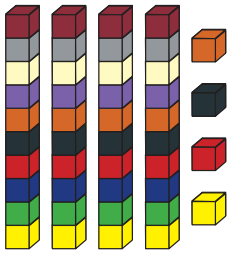
Let us Do



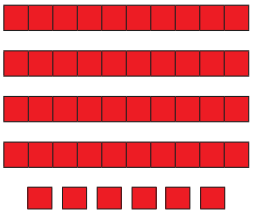
_3_ block sticks
and _4_ blocks
_34_ total blocks



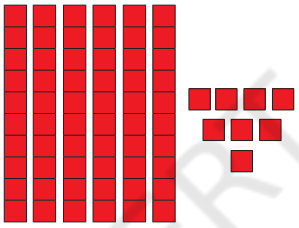
___ block sticks
and ___ blocks
___ total blocks



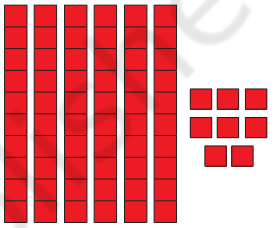
___ block sticks
and ___ blocks
___ total blocks



___ ten strips and
___ units
___ total units



___ ten strips and
___ units
___ total units

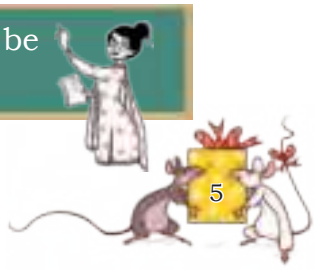


___ ten strips and
___ units
___ total units

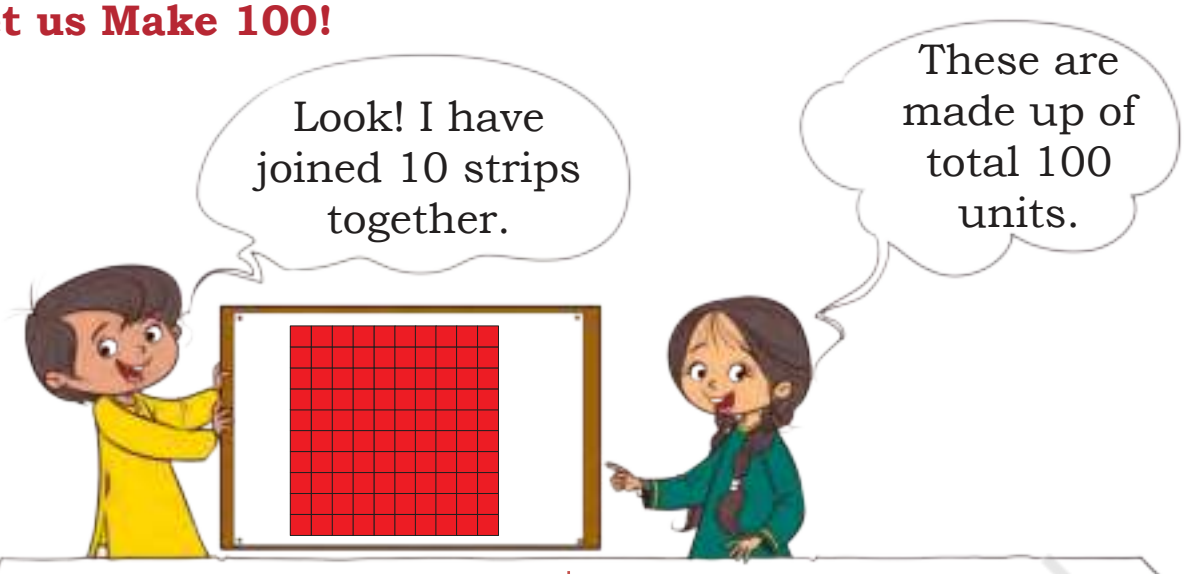
Complete the below table.

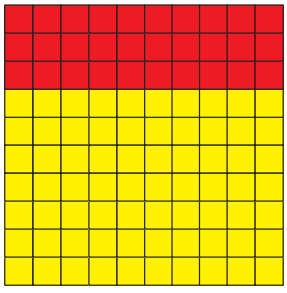
Total blocks/ units	Ten strips 	Units 
24	2	4
36		
72		
69		
46		

Use sticks or bundles of sticks or similar material which can be grouped to develop number sense among children.

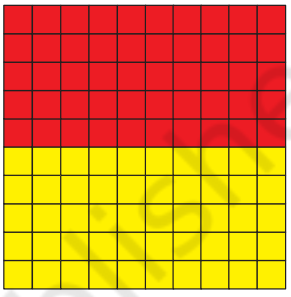


Let us Make 100!

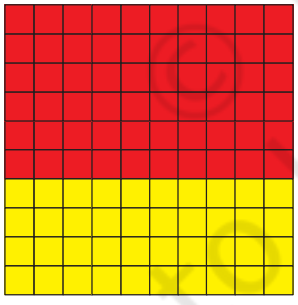




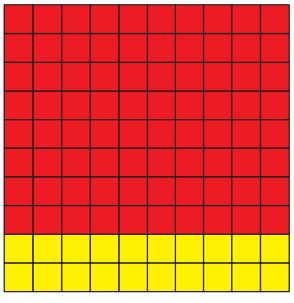
70 yellow units and 30 red units. 7 yellow ten strips and 3 red ten strips. Total 100 units or 10 ten strips.



___ yellow units and ___ red units ___ yellow ten strips and ___ red ten strips. Total ___ units or ___ ten strips.



___ yellow units and ___ red unit ___ yellow ten strips and ___ red ten strips. Total ___ units or ___ ten strips.



___ yellow units and ___ red units ___ yellow ten strips and ___ red ten strips. Total ___ units or ___ ten strips.

Discuss some other combinations of ten strips that make a 100 units grid.

Reprint 2024-25

Let us Make 100!

Let us play this game in groups of 5 or 6. One member will become the banker. Each team member will roll two dice together and take that many units from the bank. Whenever there are units that are equal to or more than 10, they will exchange the ten units for a ten strip from the banker. Play the same and collect 10 tens strips and put them to make a 100 units grid. We can also use items like *rajma*, pebbles, *chana*, etc., as units.

Counting through Cards

Encourage children to use different cards for tens and ones.

Reprint 2024-25

Let us Think

Complete the following.

3 tens 1 one = 30 + 1 or

▲	●
T	O
3	1

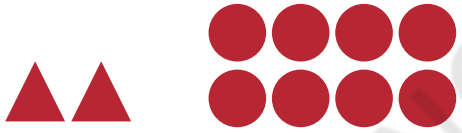
So, there are total of 31 shells.

___ tens ___ ones = ☐ + ☐ or

T	O

___ tens ___ ones = ☐ + ☐ or

T	O



___ tens ___ ones = ☐ + ☐ or

T	O

Draw tens (▲) and ones (●) cards and fill in the blanks.

☐ = 90 + 3 or

___ tens ___ ones

T	O

☐ = ☐ + ☐ or

___ tens ___ ones

T	O
7	5

☐ = ☐ + ☐ or

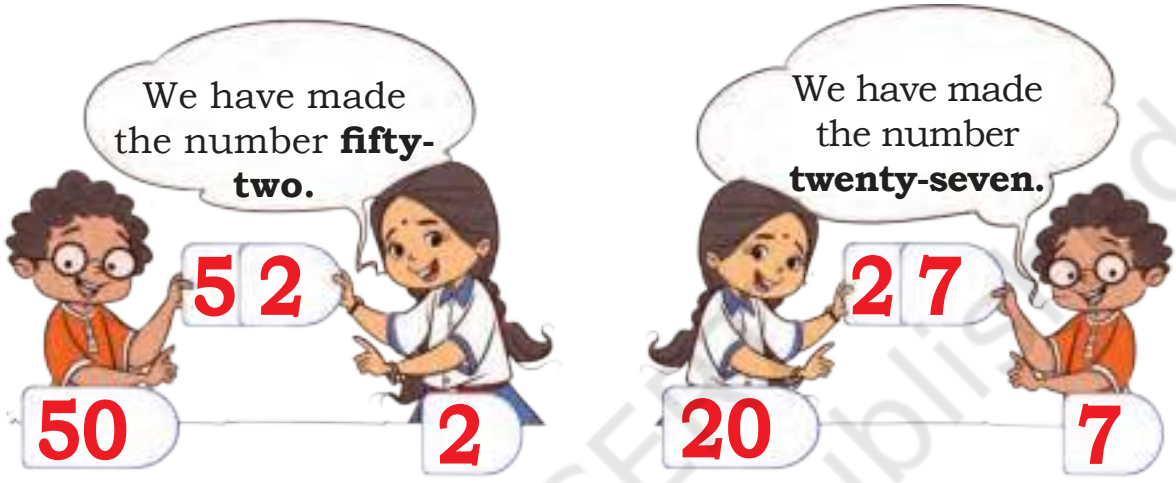
___ tens ___ ones

T	O
2	9

Let us Play

Make Numbers

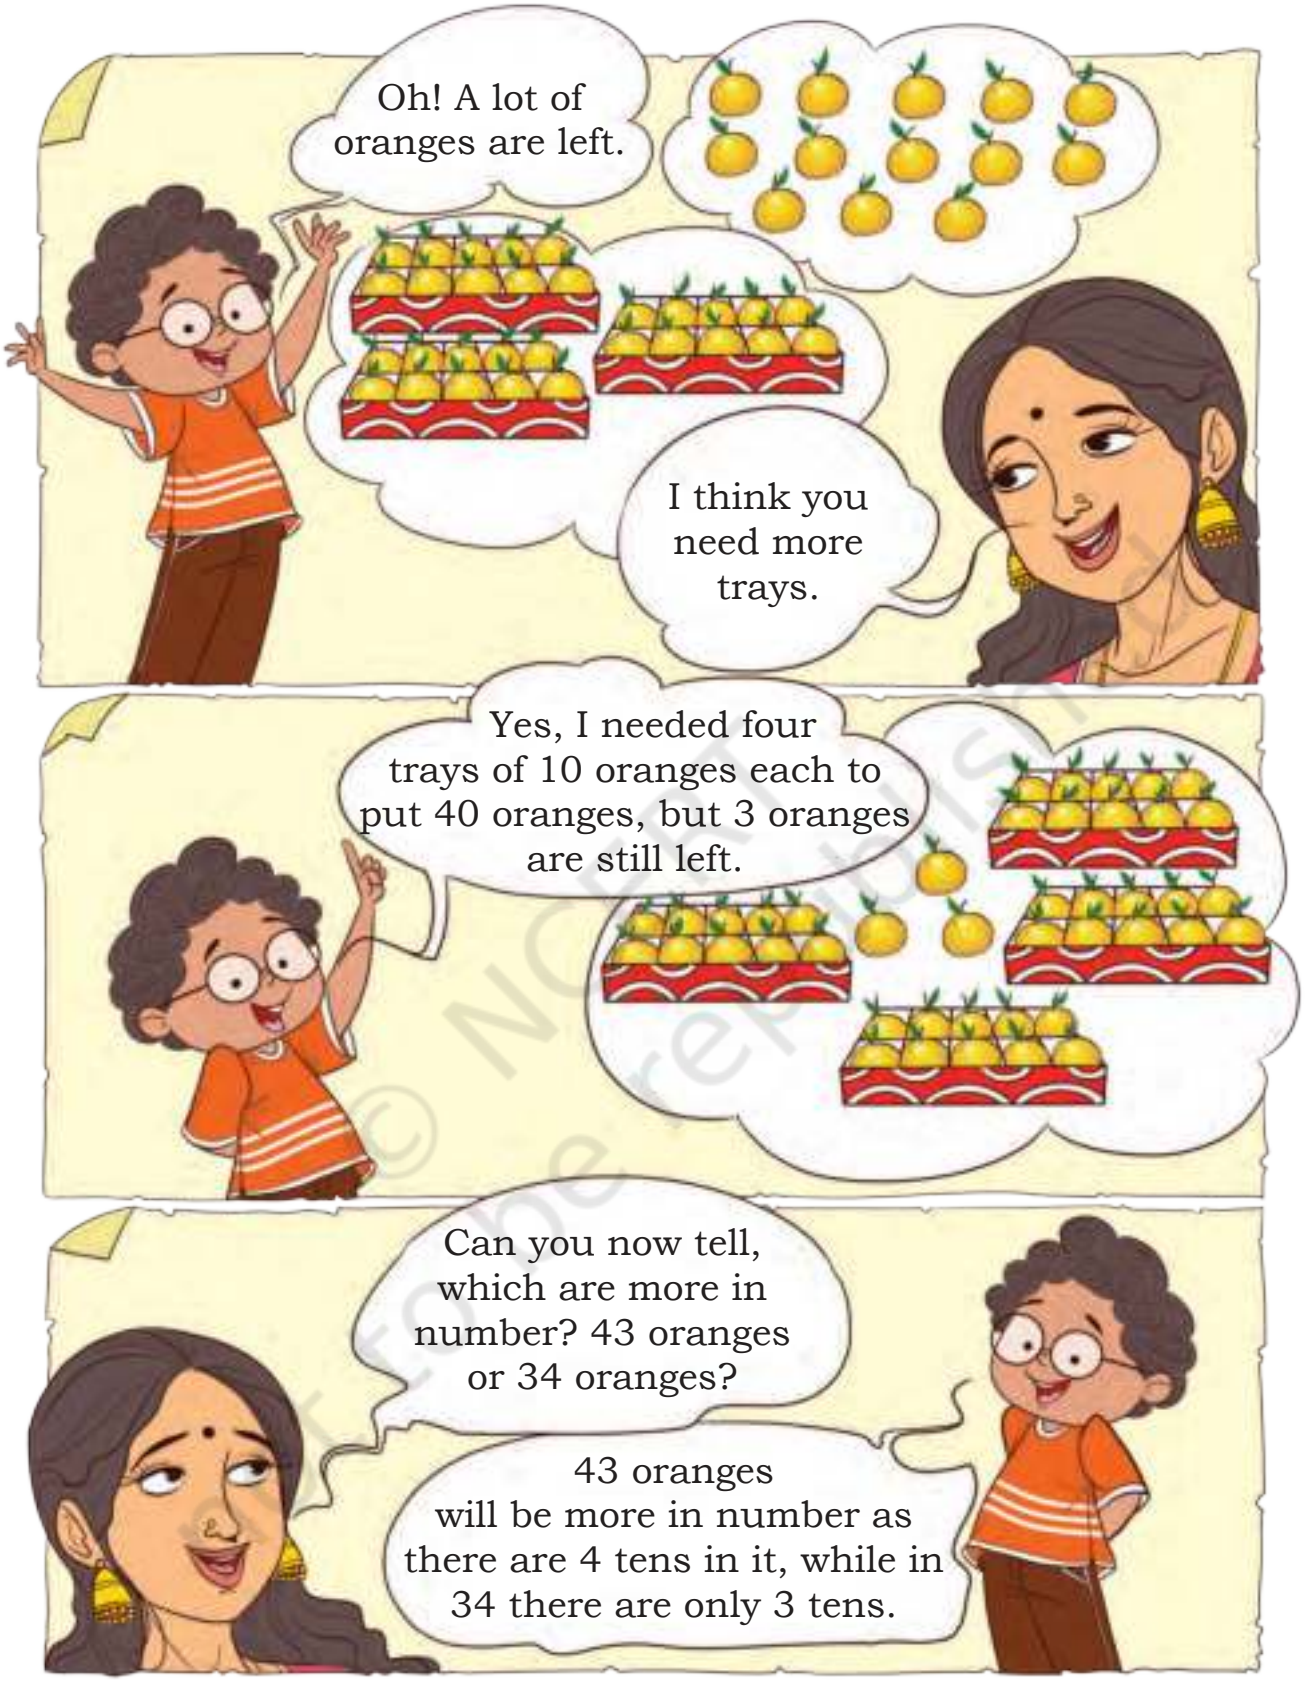
Children can make numbers using different number cards either of tens or ones. The teacher calls out a number, say, 52. The children with numbers cards of 50 and 2 will come together and form the number 52 as shown below. The game continues for other numbers such as 27.



Trays of Oranges

Let children have lots of practice on regrouping a number in tens and ones. For example, 73 is made up of 70 and 3 or 7 tens and 3 ones. Let children make their own worksheets for two digit numbers.

73	70 + 3	T	O
		7	3

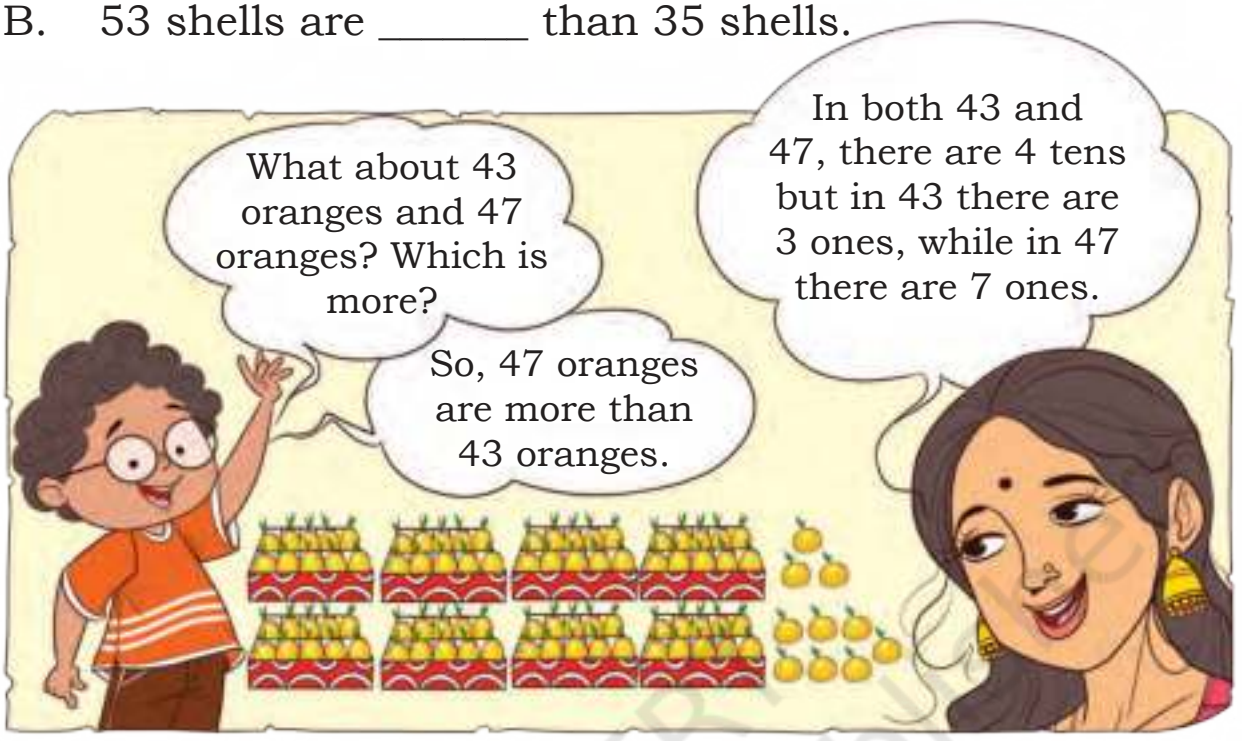


Which is less **27** oranges or **72** oranges? Why?

Fill in the blanks with more or less.

A. 67 *chikoos* are _____ than 76 *chikoos*.

B. 53 shells are _____ than 35 shells.



Let us Do

Fill in the blanks.

A. 29 is more than 20.

B. _____ is less than 41.

C. _____ is less than 76.

D. 49 is more than _____ .

E. 25 is less than _____ .

F. _____ is less than 2.

G. 36 is more than _____ .

H. _____ is more than _____.

Discuss with children the situations where they can compare two quantities. Ask children to make two groups of concrete objects like pebbles, marbles, bottle caps, seeds, etc., and to estimate which group as more number of objects.

Let them then verify their estimate by counting the objects.

Reprint 2024-25

Flash Card Game

A. Make flash cards of numbers from 0 to 9. Make the desired number according to the rules given below by placing these cards appropriately at tens and ones place.

i. A number greater than 50.

ii. A number less than 30.

iii. A number between 47 and 59.

iv. Which is the smallest two-digit number you can make?

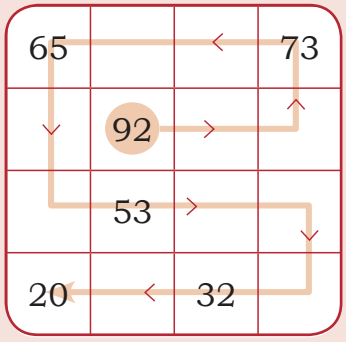
v. Which is the largest two-digit number you can make? Why do you think that the number you made is the largest?

B. Choose any two flash cards and make a two-digit number. Now swap these flash cards to get another number and find out whether it is bigger or smaller than the previous number. How will you get the largest number using same digits?

Tens	Ones	Tens	Ones
3	5	5	3

Mark by Passing the Path

From the largest number, try to reach the smallest one in decreasing order by passing through each and every number atleast once.



34			53	
	91			76
	14			11
				19
23				

			51	
58				
			63	43
75			86	
29				34

Play with Numbers

Who am I?

A. I am the largest two-digit number. ☐

B. I am the largest two-digit number where no digit is repeated. ☐

C. I am the smallest two-digit number. ☐

D. I am the smallest two-digit number, my digits are repeated. ☐

E. I am the smallest two-digit number with 3 at the tens place. ☐

F. I am the largest two-digit number with 2 at the ones place. ☐

Make your own such questions.

Reprint 2024-25

Vallam kali

In Kerala, Onam is celebrated through a famous snake boat race called as *vallam kali*. The race has nearly come to an end. Look at the picture and observe the position of each boat.

A. Which colour boat came first in the race? _____

B. Which colour boat is likely to come third? _____

C. At which positions are blue and green boats? _____

D. Write the position of pink and orange boats on the basis of the picture. _____ _____

Look at the month of August in the calendar given below.

Sun	Mon	Tue	Wed	Thu	Fri	Sat
		1	2	3	4	5
6	7	8	9	10	11	12
13	14	**15** Independence Day	16	17	18	19
20	21	22	23	24	25	26
27	28	**29** Onam	**30** Raksha Bandhan	31		

*Calendar based on 2023

Read the calendar and answer the following questions.

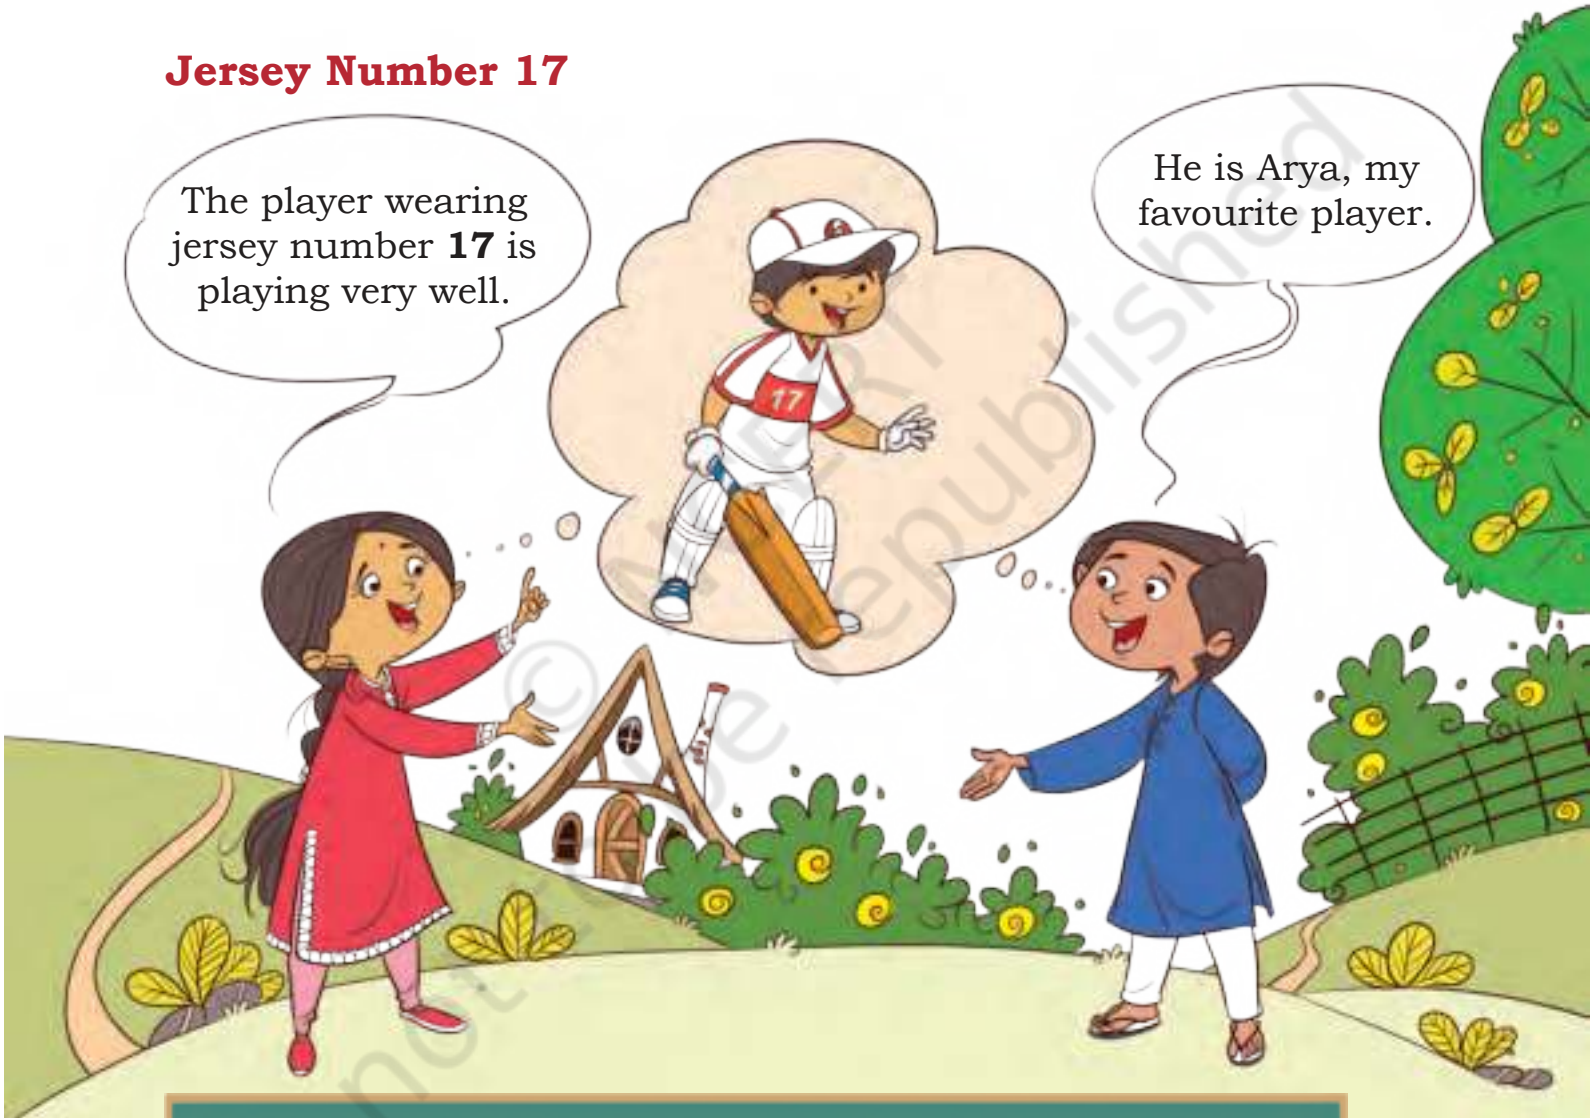
A. Onam will be celebrated on which day of the month? ____

B. When is the Independence day celebrated? ____

C. Raksha Bandhan is on ____ Wednesday of this month.

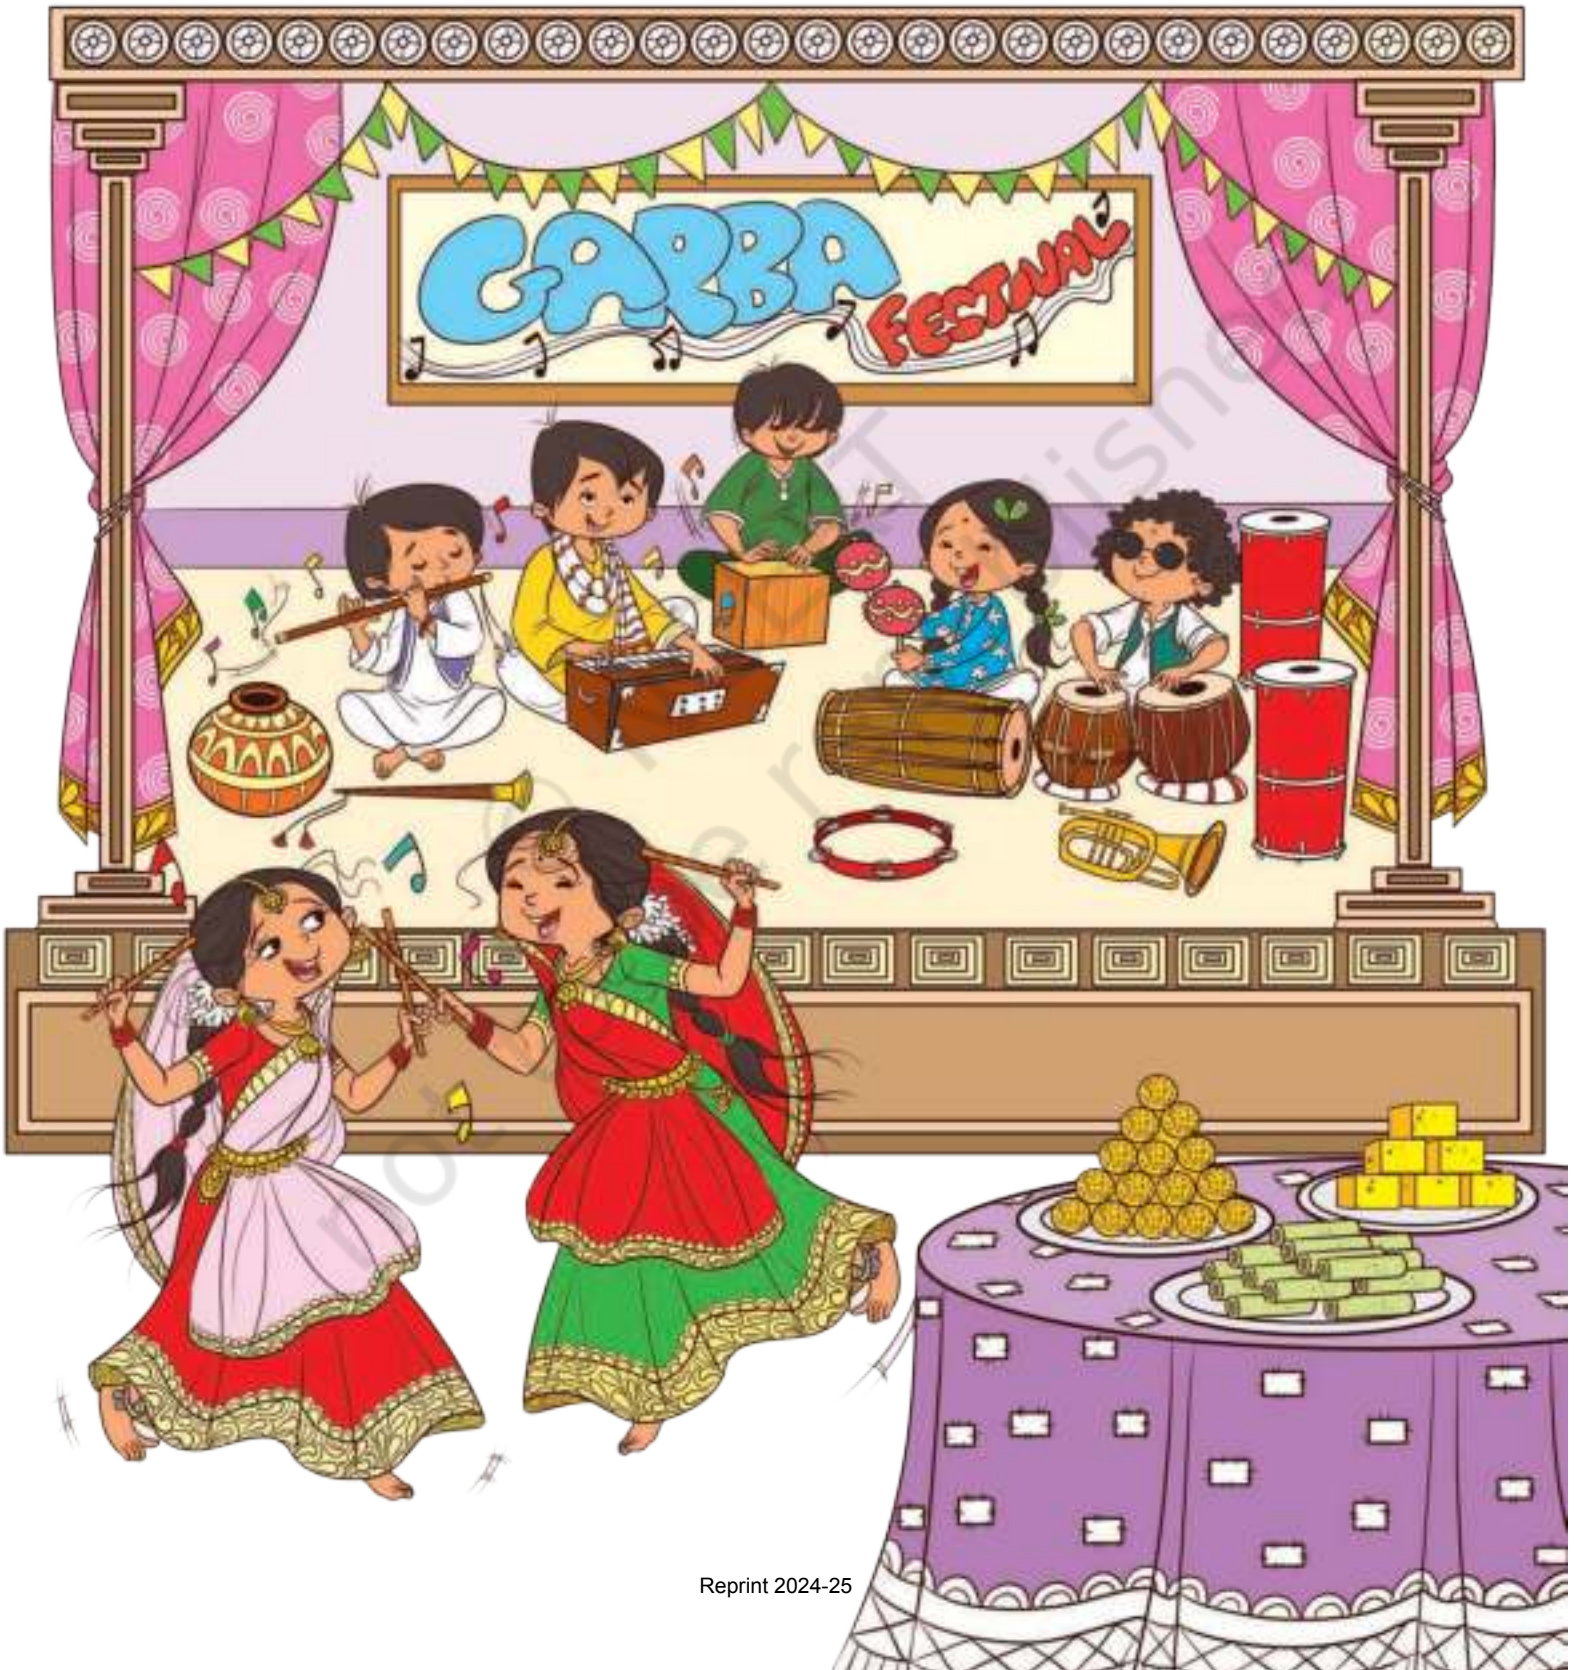
Find out if any of your friends celebrated their birthday in the month of August. Mark it on the calendar.

Jersey Number 17



Discuss with students about various other places where they can see numbers as labels or names around them. For example, house number, pillar number, roll number, bus or train number, etc. Tell children that the beautiful way in which we all write numbers today, using the digits 0 and 1–9, originated in India.

2 Shapes Around Us



Let us Do

A. Look at the picture and observe different musical instruments.

i. Circle ◯ the musical instruments that are similar in shape to a drum.

ii. Tick ✓ the musical instruments that are similar in shape to a *matka*.

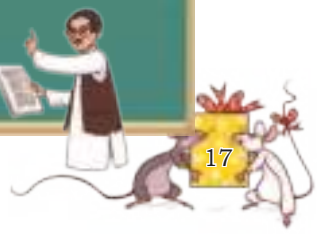
iii. Tick ✓ the shape similar to the shape of a shehnai (, ,).

iv. How is the shape of harmonium different from the shape of a drum?

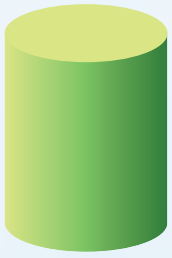
B. Have you seen or played any of the musical instruments? Share your experiences with your classmates.

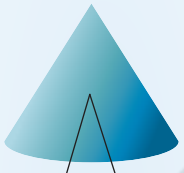
C. Cross the odd one out.

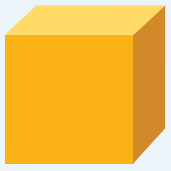
Initiate discussion about the similarities in the shape of various musical instruments and talk about locally available instruments and the way they are played. For example, drum and *tabla* are played by beating them, whereas guitar and *sitar* are played using their strings, and *shehnai*, flute, etc., are played by blowing air into them.



Match the musical instruments and objects with their solid shapes. One has been done for you.







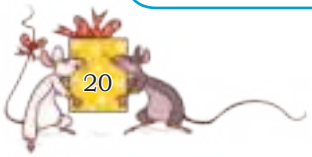
Heena and Atif

Let the children experience the surfaces, edges and corners of solid objects like chalk box, duster, chalk, etc.

Let us Do

If you also have to decorate the following shapes in the same way with stars, ribbon stripes and pompom balls, how many of these items will you need?

Object	Number of stars for the faces	Number of ribbon stripes for the edges/sides	Number of pompom balls for the corners
			
			
			



Let us Think

Look at the objects and fill the table.

Object	I look like a	Faces	Edges	Corners
	Cube			
	Cuboid			
	Cone			
	Cylinder			
	Sphere			
	Cuboid			
	Cone			
	Cylinder			

Let us Play

Touch and Tell. Who am I?

Collect different objects with variation in faces, corners and edges. Blindfold the child and ask them to pick an object as per the details given by other children. For example, a child may be asked to take out an object with one corner. Similarly, continue with other objects.

Let us Do

Name the objects which have—

No Corners	One Corner
A. _____	A. _____
B. _____	B. _____
C. _____	C. _____

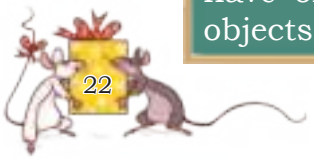
Three Corners	_____ Corners
A. _____	A. _____
B. _____	B. _____
C. _____	C. _____

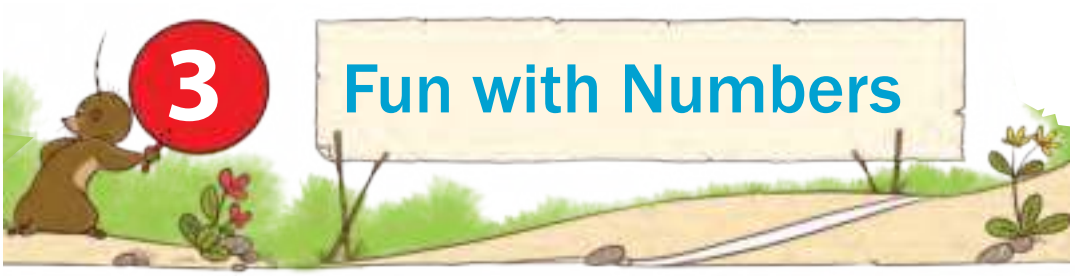
Project Work

Take a cardboard sheet and try to make an object with four faces.

Now, try to make an object with one face.

Encourage children to discuss and find out the objects which have one, two, three or no corners. They may make such objects using clay or dough.





3 Fun with Numbers

Look at the *Ginladi*.

A. How many beads are there in *ginladi*?

B. There are some blank cards on the *ginladi*. Write the numbers on them by counting the number of beads.

C. Make number cards for the following numbers and place them on your *ginladi*.

38, 44, 58, 65, 98

Look at the number strip and fill in the blanks.

A. The butterfly moves _____ steps forward to reach the pink flower.

B. The honey bee moves _____ steps forward to reach the red flower and _____ steps forward to reach the yellow flower.

C. The squirrel jumps 2 steps backward, five steps forward and again 3 steps backward. It will reach at _____.

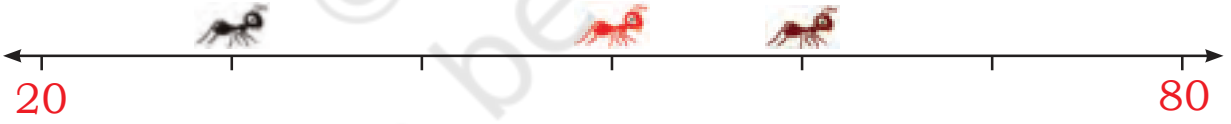
D. The frog jumps 2 steps forward, seven steps backward and again 3 steps backward to reach _____.

Guess my Number

A child thinks of a number and other children have to guess it. Children will ask questions like, is it more than 50? Are the two digits of the number same? Questions that can be answered in 'yes/no'. They can ask maximum 10 questions to guess the number.

Guess my Place

Three ants are sitting on a number line. Write the numbers for these ants.



Black ant is sitting on the number _____

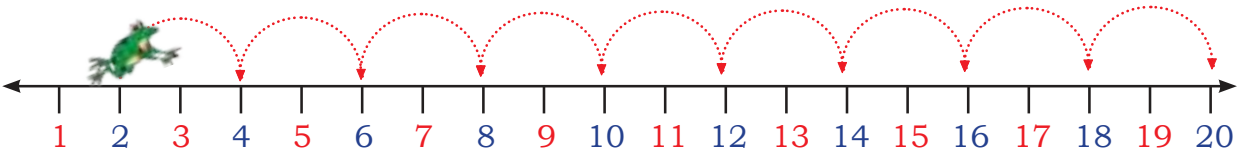
Red ant is sitting on the number _____

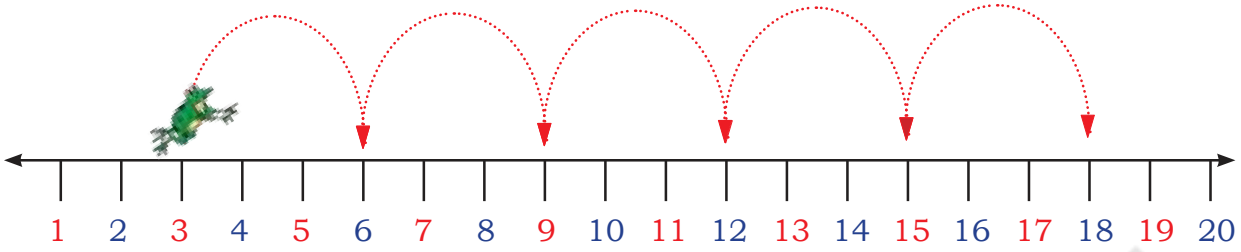
Brown ant is sitting on the number _____

Draw an ant on number 65 on the number line shown above.

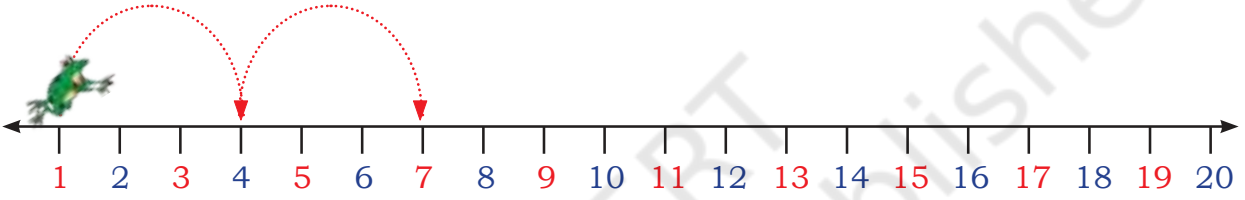
Draw a sugar cube on number 79 on the number line shown above.

Look! How Jumpy, the frog is jumping. Do you observe a pattern here?

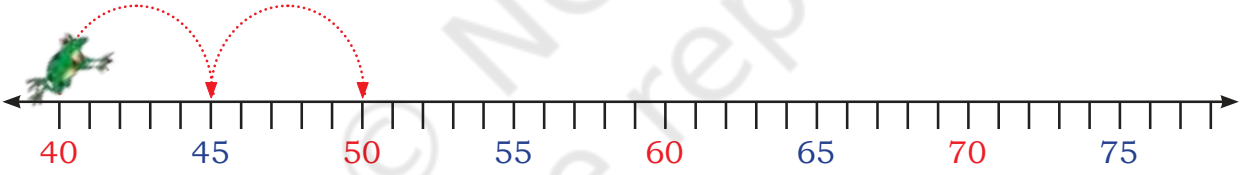




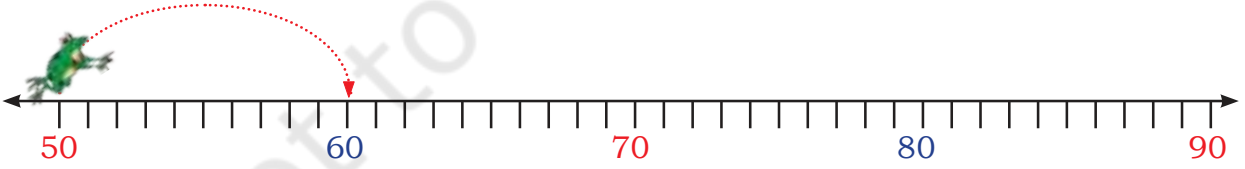
Complete the following patterns.



A. 1, 4, 7, _____, _____, _____, _____



B. 40, 45, 50, _____, _____, _____, _____, _____



C. 50, 60, _____, _____, _____

Encourage children to make their own number line on the ground and ask them to jump on it. Ask them questions such as if you jump in steps of two, which numbers will you step on, etc.

Reprint 2024-25

Let us Do

A. On the number chart, use skip counting in two and draw ● on the numbers. Now use skip counting in five and draw ▲ on the numbers in the number chart.

B. Write down the numbers that are common to the skips in twos and fives.

_____

C. Write down the numbers that are common to the skips in twos, threes and fives.

_____

D. Write down the numbers common to the skips of fives and sevens?

_____

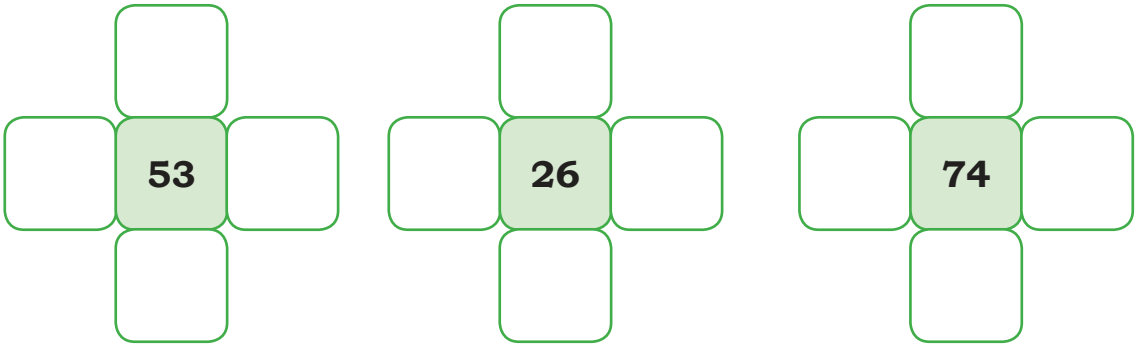
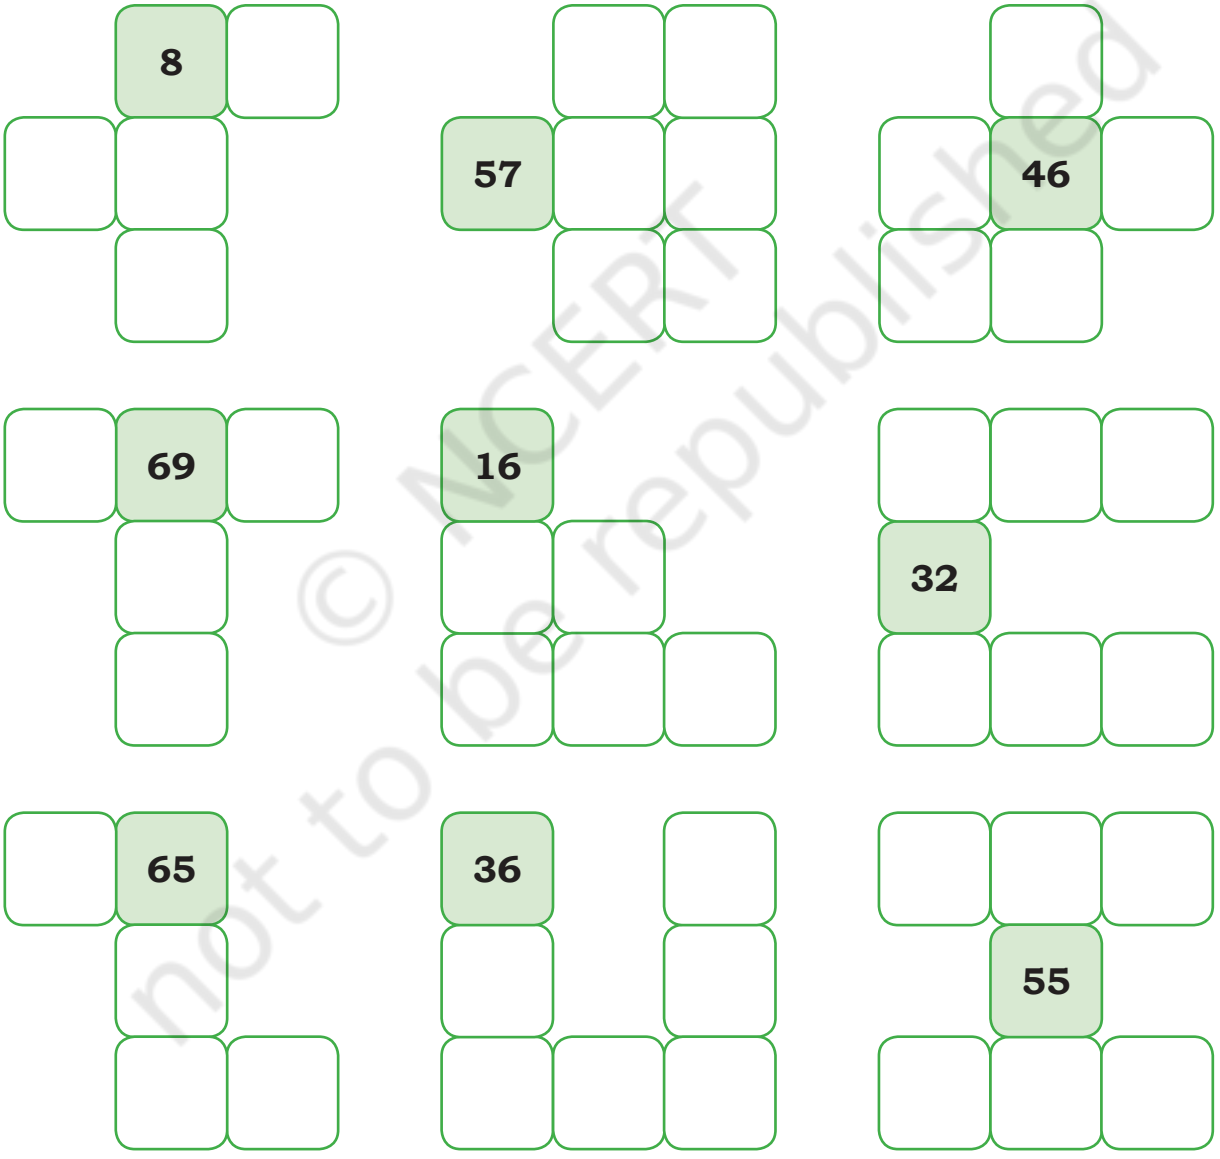
E. Let us do it for other numbers.



F. Based on the same number grid fill the missing numbers.



Observe how the number of blocks are increasing in the following shapes and extend the pattern.

A. 
_____ _____

B. 
_____ _____

C. 
_____ _____

Let us Play – Bingo!

Make a 3 × 4 grid  for playing 'Bingo'.

Fill the boxes of the grid with any number from 2 to 12. Numbers can be repeated.

Let one child throw two dice and say the sum of the numbers of dots on the dice. Other children will cross the number on their grid. Continue this till child crosses all the numbers. Bingo!

Encourage children to develop their strategy for selecting the numbers to be written on the grid.

4 Shadow Story (Togalu)

Nakul and his friends saw a shadow play known as *Togalu Gombeyaata* in a village fair. They all were fascinated to see the shadows.

They also wanted to make shadows. So, they made different animal shadows on the wall with their fingers. You can also try to make the shadows.

Share information about *Togalu Gombeyaata* with children which is a puppetry art form practised in Karnataka. The puppets are used to depict scenes from Indian epics. Let children also share their experiences of watching a puppet show.

Let us Do

Do a role-play by making the shadows of different animals and creating their sounds.

Let us Talk

A. Have you seen your own shadow or the shadow of a tree, a dog, a cow or any other animal?

B. When do we see a shadow?

C. When does a shadow vanish?

Fun with Shadows

Now put the torch light on the objects around you and observe the shapes of their shadows.

A. Will the size of shadows change on changing the position of the torch?

B. At what time of the day is your shadow longest?

C. At what time of the day is your shadow shortest?

Discuss with children about their observations on their shadows at different times of the day and the reasons behind it.

Reprint 2024-25

Let us Trace

A. Trace the shape of the objects around you. For example, eraser, leaf, matchbox, sharpener, pencil colour, etc.

B. Draw the shapes you get after tracing.

Let us Think

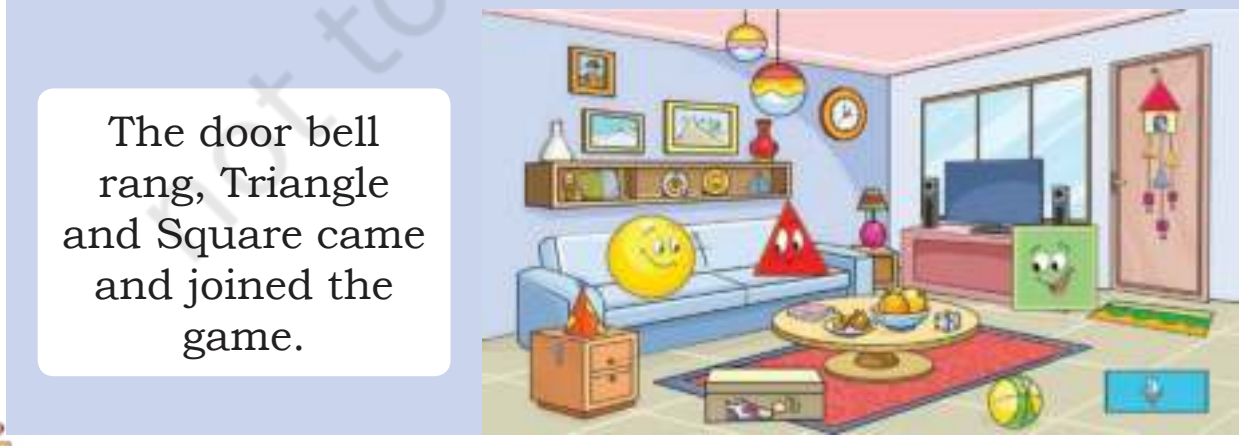
Write the names of objects that have the same trace as:

A. Bottle cap

B. Eraser

Hide and Seek

Circle ◯ and rectangle ▭ are playing hide and seek. Rectangle is hiding from the circle.



They all are playing together now.

A. Circle ◯ can hide in the clock, ball, _____, _____.

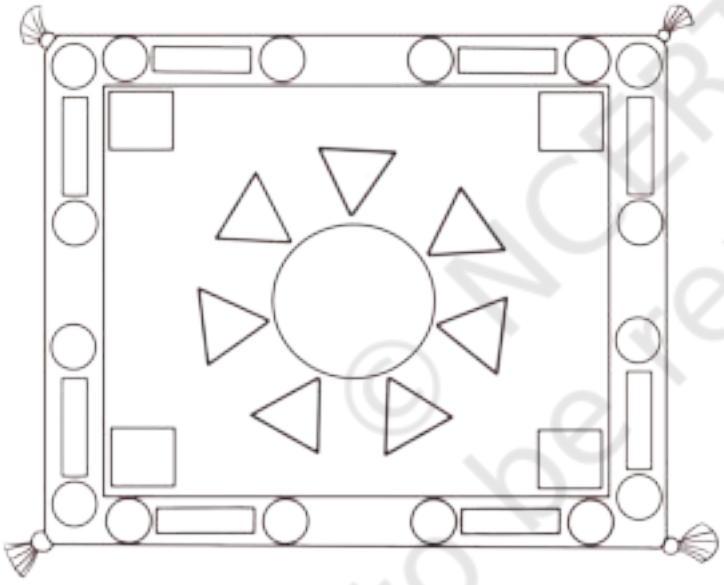
B. Rectangle ▭ can hide in the shoe box, photo frame, _____, _____.

C. But Triangle △ and Square □ are confused and wonder where to hide now. Suggest them some places where they can hide.

i. Triangle △ can hide in _____, _____.

ii. Square □ can hide in _____, _____.

Colour the Carpet



Colour the Triangles red.

Colour the Circles green.

Colour the Rectangles yellow.

Colour the Squares blue.

Make your own design with different shapes and colour them.

Reprint 2024-25

Catch the Corner!

Naveen and his friends are playing a game. Naveen is standing facing the wall and clapping. His friends are running along the table as he claps. When he stops clapping, everybody stops. The child who is not at a corner will be out. Then the child will clap and the game will go on.

Look at the picture and answer the following questions.

A. Name the children standing near the corners of the table.

B. Can you tell who will clap next?

C. Where is Wasim standing?

D. Can this game be played around a round table? Why or why not?

E. Name the objects around us that have straight edges.

F. Many objects around us have curved edges. Some are shown below. Explore and share the names of such objects that you see around.

Let us Think

A. How many corners do objects with curved edges have?

B. Name the objects that have both straight and curved edges?

Origami Fun!

A. Take a paper and fold it to make it a square.

B. It has ____ corners and ____ edges.

C. Fold it in half by joining two corners as shown in the picture.

D. Tick ✓ the shape which you get.

i. ● ii. ■ iii. ▲

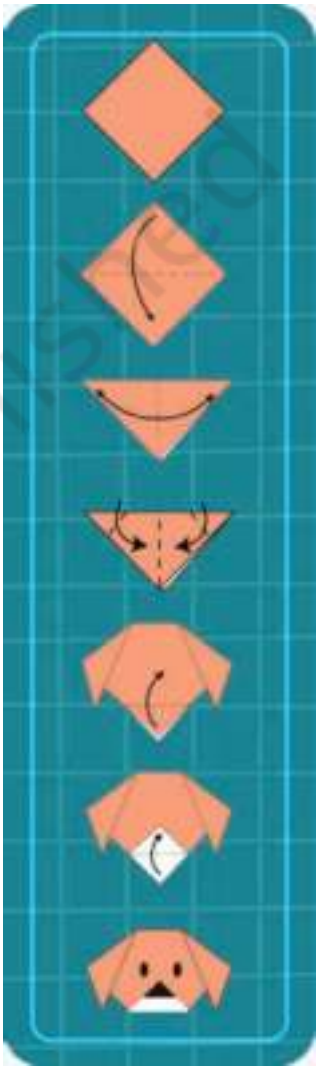
E. This shape has ____ corners and ____ edges.

F. Fold the paper again into half to get a triangle and then unfold it.

G. Now make two triangles from two corners of the triangle.

H. How many corners are there now? ____

I. Fold the third corner upwards and make the nose and eyes as shown.



Your paper dog is ready!

Can you fold the square sheet in such a way so as to get a shape with 4 sides? How many corners does it have now?

Ask children to explore various objects around them and ask them to find out the number of their edges, corners and sides.

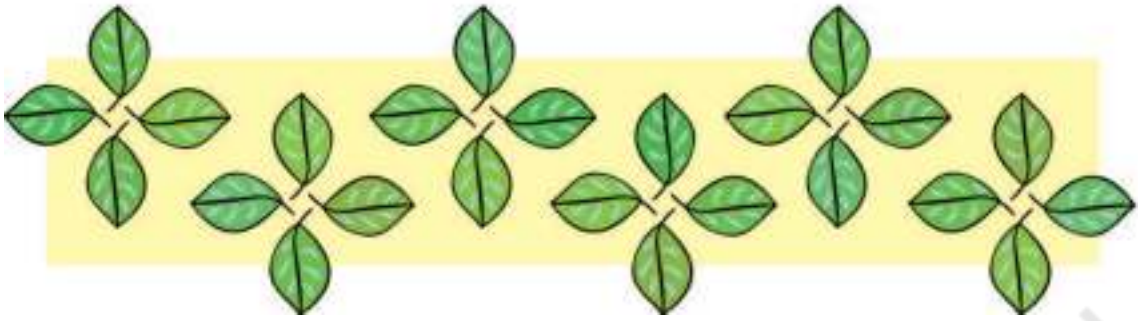
Patterns

A. Make designs by stamping objects having different shapes like — bottle caps, erasers, pencils, coins, etc.

B. Radha is applying *mehandi* on her hands. You can also trace your hand to make a *mehandi* pattern or design.

Let us Do

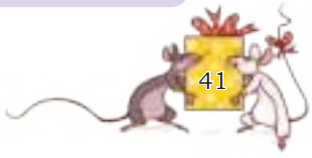
Nitya is playing with leaves and making patterns.



Now you also collect some leaves and make a pattern. Paint one side of the leaf and print it on the space given below.

Project Work

Make a wall hanging using cutouts of different shapes with the help of your elders to decorate your home or classroom.



Extend the following patterns.

A. 
B. 
C. 

D. 
E. 

F. 
G. AB BC CD

H. AA BB CC DD EE

I. 
Kikku rabbit jumps on the 4th tile. He forgot where to jump next. Help him by drawing a circle ◯ on the next tiles.

1, 4, _____, _____, _____, _____, _____, _____

Kikku's mother also jumps on the 6th tile. Help her by putting a × on the next tiles.

1, 6, 11, _____, _____, _____, _____, _____

Let us Do

Extend the following number patterns.

A. 5, 10, 15, ☐ ☐ ☐ ☐ ☐

B. 7, 14, 21, ☐ ☐ ☐ ☐ ☐

C. 1, 7, 13, ☐ ☐ ☐ ☐ ☐

5 Playing with Lines

Let us Do

A. Circle ◯ the *aasanas* with standing or vertical lines.

B. Tick ✓ the *aasanas* with both vertical and slanting lines.

C. Cross ✗ the *aasanas* which have curved lines.

D. Put a star ★ along the *aasanas* that have sleeping or horizontal lines.

E. Try some of these *aasanas*. Discuss the lines that you notice while doing the *aasanas*.

Facilitate the children in practising yoga poses. Give instructions like, keep the back straight, arms straight, curve the back, slant the arms and legs, etc. Also tell them about *Ashtanga Yoga,* as described in the ancient *Yoga Sutras* of *Patanjali.*

What is Straight?

Hold a piece of thread in your hands.

Is it straight?

Now bring your hands closer.

Is the thread straight now?

This is now standing/sleeping/slanting.

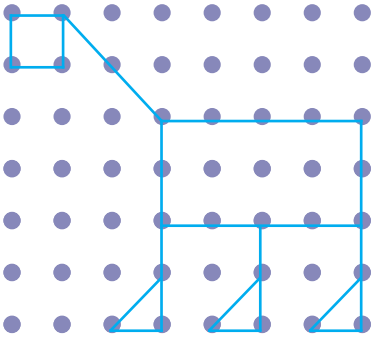
Let us Do

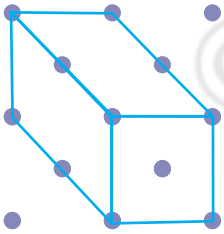
Trace the missing vertical, horizontal, slanting and curved lines in the picture given below.

Reprint 2024-25

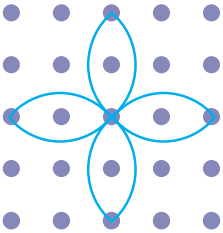
Let us Play with Dots

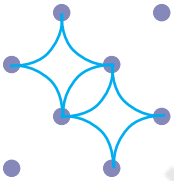
A. Make new shapes with straight lines (vertical, horizontal and slanting).





B. Draw different figures with the help of curved lines, like clouds, rainbow, etc.





Let us Do

A. Make your own drawing using different types of lines in the space given. Draw a design with any two types of lines.

B. Draw a design with any three types of lines.

C. Draw a design using all types of lines.

Project Work

Fun with Folding

If we fold a paper in half, it makes a crease in the center. Now if we keep folding the paper further we get a number of creases. Let us see the different lines we get after folding the paper. Trace the straight lines with red crayon and slanting lines with blue crayon.

A. Fold a paper with your friend and check who gets the maximum number of creases.

B. Try to make curved lines by paper folding.

Discuss various art forms like *Madhubani*, *Kalamkari*, *Warli* or any other local art forms that they are familiar with. Teacher might invite local painters to share their process of drawing different lines and shapes with children.

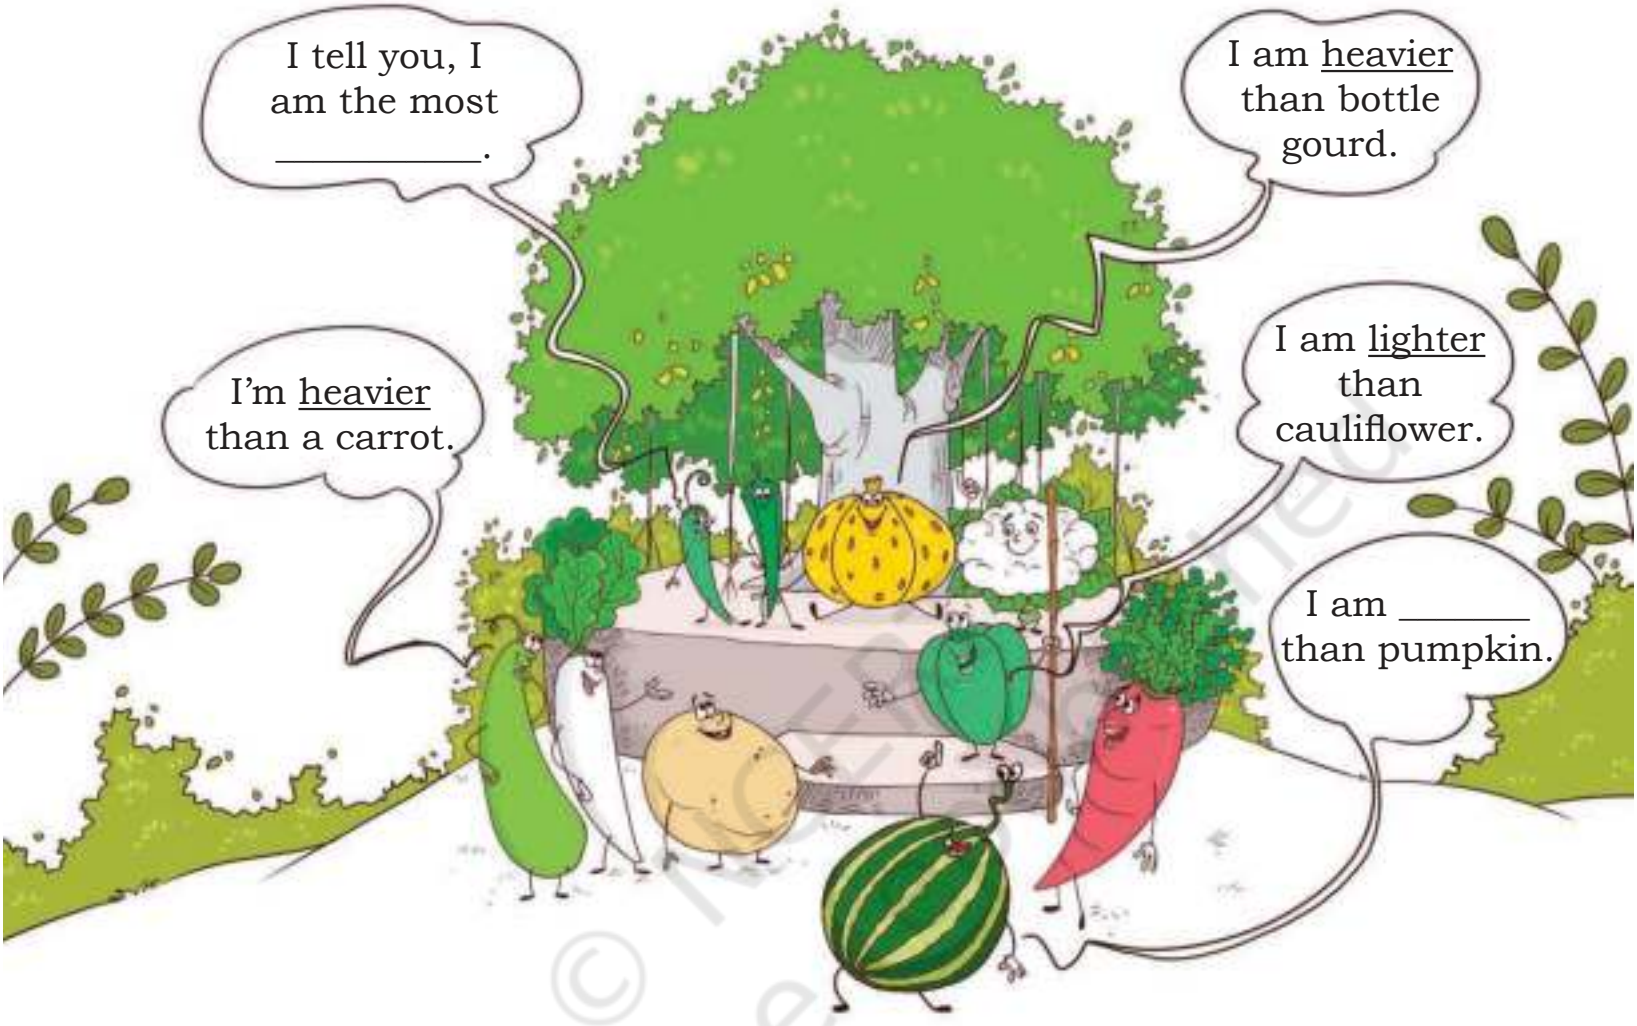
Find the length of the following using any tool of your choice (eraser, blocks, pencil). Record your measurement.

- Any wall of your house
- Length of your bed
- Length of a door

Pumpkin's Chaupal

Look at the picture and compare which vegetables are lighter or heavier than the other vegetables.



What do you think is heavier— a pumpkin or a watermelon? Discuss.

Fill in the blanks.

A. Muskmelon is heavier than carrot.

B. Capsicum is lighter than _____.

C. _____ is heavier than _____.

D. _____ is lighter than _____.

E. _____ is the heaviest of all.

F. _____ is the lightest of all.

Let us Do

Collect a few things from your surroundings. Sort out the lightest and the heaviest among those. Arrange all the things in the increasing order of their weight.
How do you know which is light and which is heavy?

Make your own Balance!

Make your own balance with the help of a paper cup, thread and a hanger like the one shown here. Now compare any two objects like eraser, ball, bead, pencil, crayon, etc., to see which one is heavier.

Let us Do

Circle ◯ the heaviest one.

A.

B.

Circle ◯ the lightest one.

A.

B.

Let us Think

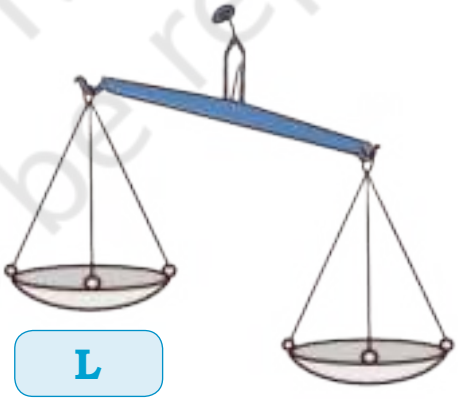
Tick ✓ the vegetables and fruits which will make the balance go down. Mark Light (L) and Heavy (H).

A.

H

L

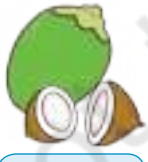
B.



L

H

C.



D.

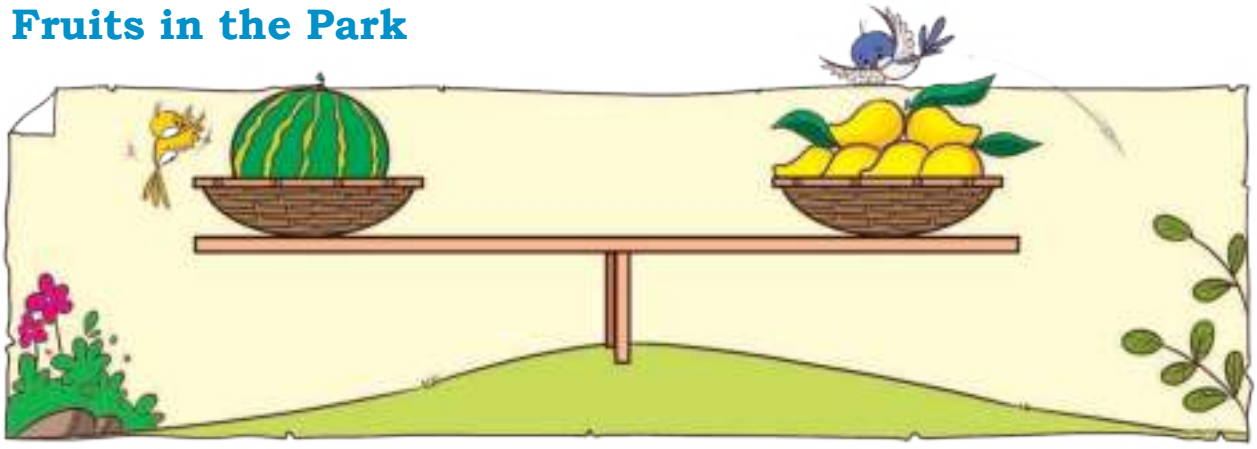
Let us Do

Take two paper bags of same size. Fill one with sand and the other with dry leaves. Discuss their weights (which bag is heavier).

Look at the pictures and discuss the different types of balance used by people in the pictures given below.

Tick ✓ the type of balance you have seen before.

Fruits in the Park



Watermelon and mango want to play on the see-saw. Watermelon sits on one side, but he could not get up. His friend mango called other mangoes to sit on the other side.

A. How many mangoes will balance the watermelon? Find out from the picture given above.

B. How many coconuts can balance the watermelon if—

Weight of 1 Coconut

=

Weight of 2 Mangoes

Project Work

Name some of your family members or friends who you think weigh

A. almost the same as you _____

B. more than you _____

C. less than you _____

Find out the places where you can check your weight. What is your weight?

Encourage students to estimate the weight of different objects around them in relation to other objects.

Let us make *Nimbu Pani.*

Raghu and his friends made *nimbu pani* for Raghu's grandmother.

He used the following things to prepare 1 glass of *nimbu pani*.

A. Water: 1 glass

B. Sugar: 1 spoon

C. Lemon juice: 2 spoons

D. A pinch of salt

Now Raghu wants to make *nimbu pani* for himself and his two friends. Raghu has to make 3 glasses of *nimbu pani*. Write the quantity of ingredients he has to use to make 3 glasses of *nimbu pani*.

Water: ☐ glasses

Sugar: ☐ spoon

Lemon juice: ☐ spoons

Salt: ☐ pinch

Find Out

Name some drinks that are prepared at your home. Find out the ingredients used for making your favourite drink and write them below.

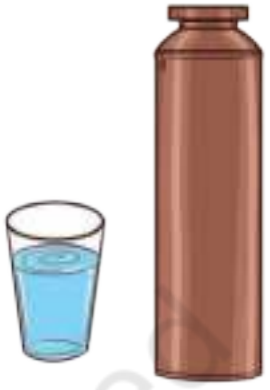
Name of your favourite drink _____

Ingredients	Quantity

Reprint 2024-25

Find Out

Raghu's bottle is filled with four glasses of water.



A. How many glasses of water can fill your bottle? ____

B. How many glasses of water can fill your friend's bottle? ____

C. Does your friend's bottle fill with equal/more/less amount of water?

Name the friend whose bottle can carry—

A. Equal water as yours ____

B. Less water than yours ____

C. More water than yours ____

Project Work

To make a *jal tarang* (musical instrument), arrange 5–7 similar glasses or bowls. Fill them with varying levels of water. Gently tap a spoon on each glass or bowl and hear how each one sounds. Tap at different parts of the glass or bowl to feel the difference.

Discuss the uses and importance of water in our life. Also discuss the proper usage and no wastage of water.

8 Grouping and Sharing

What are you looking at?

I am counting the wheels of autorickshaws and bicycles by adding the number of their wheels. But I missed the cars as they had started moving.

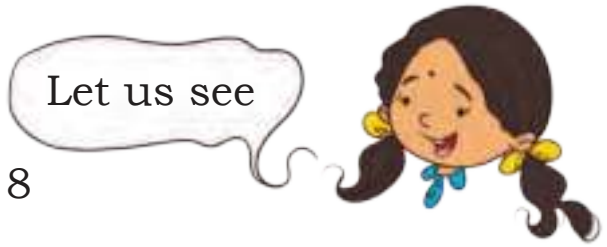
Ok! I will show you a way of finding the total number of wheels. There were 7 cars and each car had 4 wheels, so the total number of wheels is 7 times 4, means 28.

How did you do it Ramya? Can you please explain?

Discuss the importance of traffic rules with children.

Let us Do

There are 4 bicycles .
Each bicycle has 2 wheels.
Total wheels = 2 + 2 + 2 + 2 = 8
We are adding 2 for 4 times.
So, 4 times 2 is also 8 or 4 groups of 2 give 8.
You know, times can be written as '×'.
4 × 2 = 8



Number of autorickshaws = 2
Each auto has 3 wheels.
Total wheels = 3 + 3 = 6
2 times 3 is 6 or 2 groups of 3 is 6.
2 × 3 = 6

Let us do it for cars.

Number of cars = ☐

Number of wheels in each car = ☐

Total wheels = ☐ + ☐ + ☐ + ☐ + ☐ + ☐ + ☐ = ☐

☐ times 4 is ☐

7 groups of ☐ is ☐

☐ × ☐ = ☐

How many **fours** are you adding? ____
We can write it as
7 fours are 28.

Let us Do

Number of butterflies = ☐

Number of wings in each butterfly = ☐

Total number of wings = ☐ + ☐ + ☐ = ☐

or 3 groups of ☐ is ☐

☐ times 2 is 6

3 twos are ☐

☐ × ☐ = ☐

Number of octopuses = ☐

Number of legs in each octopus = ☐

Total number of legs = ☐ + ☐ = ☐

2 groups of ☐ is ☐

2 times ☐ is 16

2 eights are ☐

☐ × ☐ = ☐

Number of lines = ☐

Number of soldiers in each line = ☐

Total number of soldiers = ☐ + ☐ + ☐ + ☐ = ☐

☐ times ☐ is 40

4 tens are ☐

☐ × ☐ = ☐

Reprint 2024-25

Complete the Table

	3 + 3 + 3 + 3	4 times 3	4 × 3 = 12 Stars
	5 + 5 + 5	_____	_____ Fingers
	_____	6 times 3	_____ Bananas
	_____	_____	4 × 4 = 16 Oranges
	_____	_____	2 × 5 = 10 Pencils
	_____	_____	3 × 5 = 15 Balls

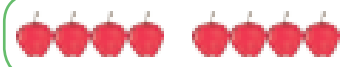
Match the Following

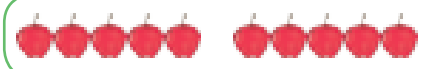
9 + 9 + 9	7 fives are	27
5 + 5 + 5 + 5 + 5 + 5 + 5	4 groups of 10	35
3 + 3 + 3 + 3 + 3	3 × 9	40
10 + 10 + 10 + 10	3 × 8	14
8 + 8 + 8	2 sevens are	15
7 + 7	5 times 3	24

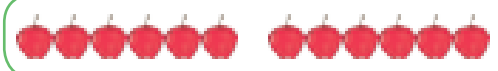
Reprint 2024-25

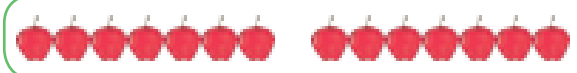
Complete the Table of 2

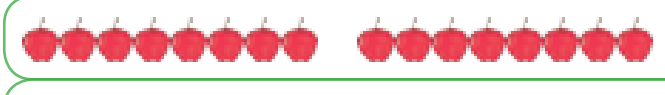
	2 ones are 2	2 × 1 = 2
	2 twos are 4	2 × 2 = 4
	2 threes are 6	2 × 3 = 6
		
		
		
		
		
		
		

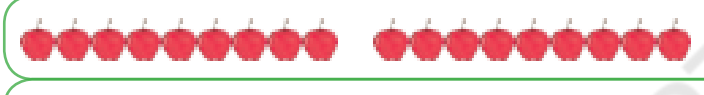


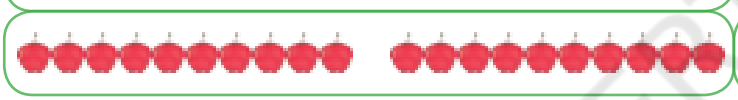






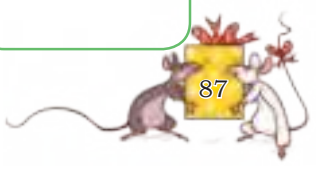






Complete the Table of 3

	3 ones are 3	3 × 1 = 3
	3 twos are 6	3 × 2 = 6
	3 threes are 9	3 × 3 = 9
		
		
		
		
		
		
		



Complete the Table of 5

	5 ones are 5	5 × 1 = 5
	5 twos are 10	5 × 2 = 10
	5 threes are 15	5 × 3 = 15
		
		
		
		
		
		
		

Complete the Table of 10

	10 ones are 10	10 × 1 = 10

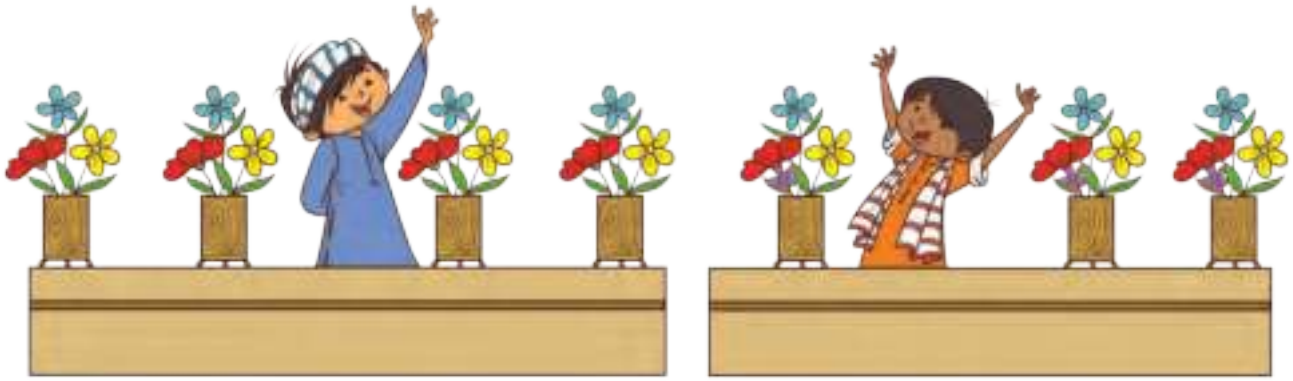
How Many?



There are 4 bouquets.

4 groups of 3 flowers

4 × 3

Ram used 12 flowers in all.

There are 3 bouquets.

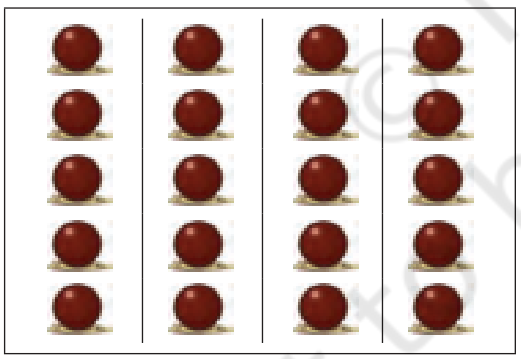
3 groups of 4 flowers

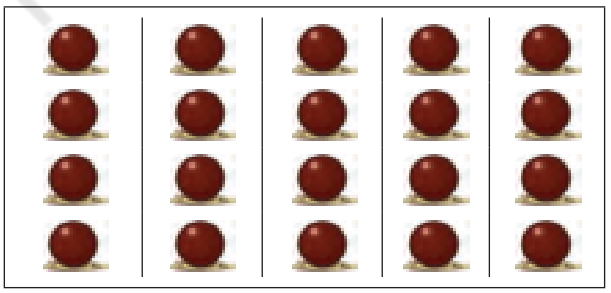
3 × 4

Gopal used 12 flowers in all.

Did you observe something? Discuss.

Test your observation with other examples.





4 groups of 5

___ times 5 is ____

4 × 5 =_____

There are ____ *gulab jamuns.*

5 groups of 4

___ times 4 is ____

5 × 4 = _____

There are ____ *gulab jamuns.*

6 groups of 4

___ times 4 is ____

6 × 4 = _____

There are _____ flowers.

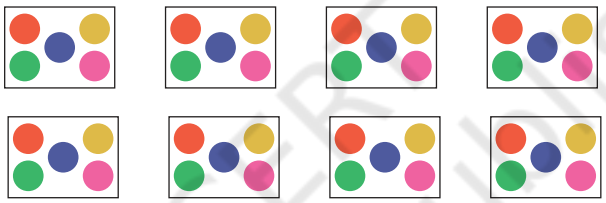
4 groups of 6

__ times 6 is ____

4 × 6 =_____

There are ____ flowers.

A. There are 8 packets of *bindis*. Each packet has 5 *bindis*.



Number of packets = ☐

Number of *bindis* in each packet = ☐

☐ groups of ☐ *bindis*.

☐ × ☐ = ☐ *bindis*

B. Bharti puts 4 buttons on each shirt. She wants to put buttons on 7 shirts.

Number of shirts = ☐

Number of buttons on each shirt = ☐

☐ groups of ☐ buttons

☐ × ☐ = ☐ buttons

C. Rita bought 6 pencils of ₹4 each. How much money will she give to the shopkeeper?

Number of pencils = ☐

Cost of 1 pencil = ☐

Cost of 6 pencils = 4 + 4 + 4 + 4 + 4 + 4

☐ × ☐ = ☐

So, Rita will give ₹ ☐ to the shopkeeper.

D. Five people can sit in a car. How many people can sit in 8 such cars?

Number of people sitting in 1 car = ☐

Number of people sitting in 8 cars = ☐

☐ × ☐ = ☐

☐ people can sit in 8 cars.

Making Multiplication Table

Rudra is making multiplication table of 4 using the table of 2.

	2	**4**	**6**	**8**	**10**	**12**	**14**	**16**	**18**	**20**	(Table of 2)

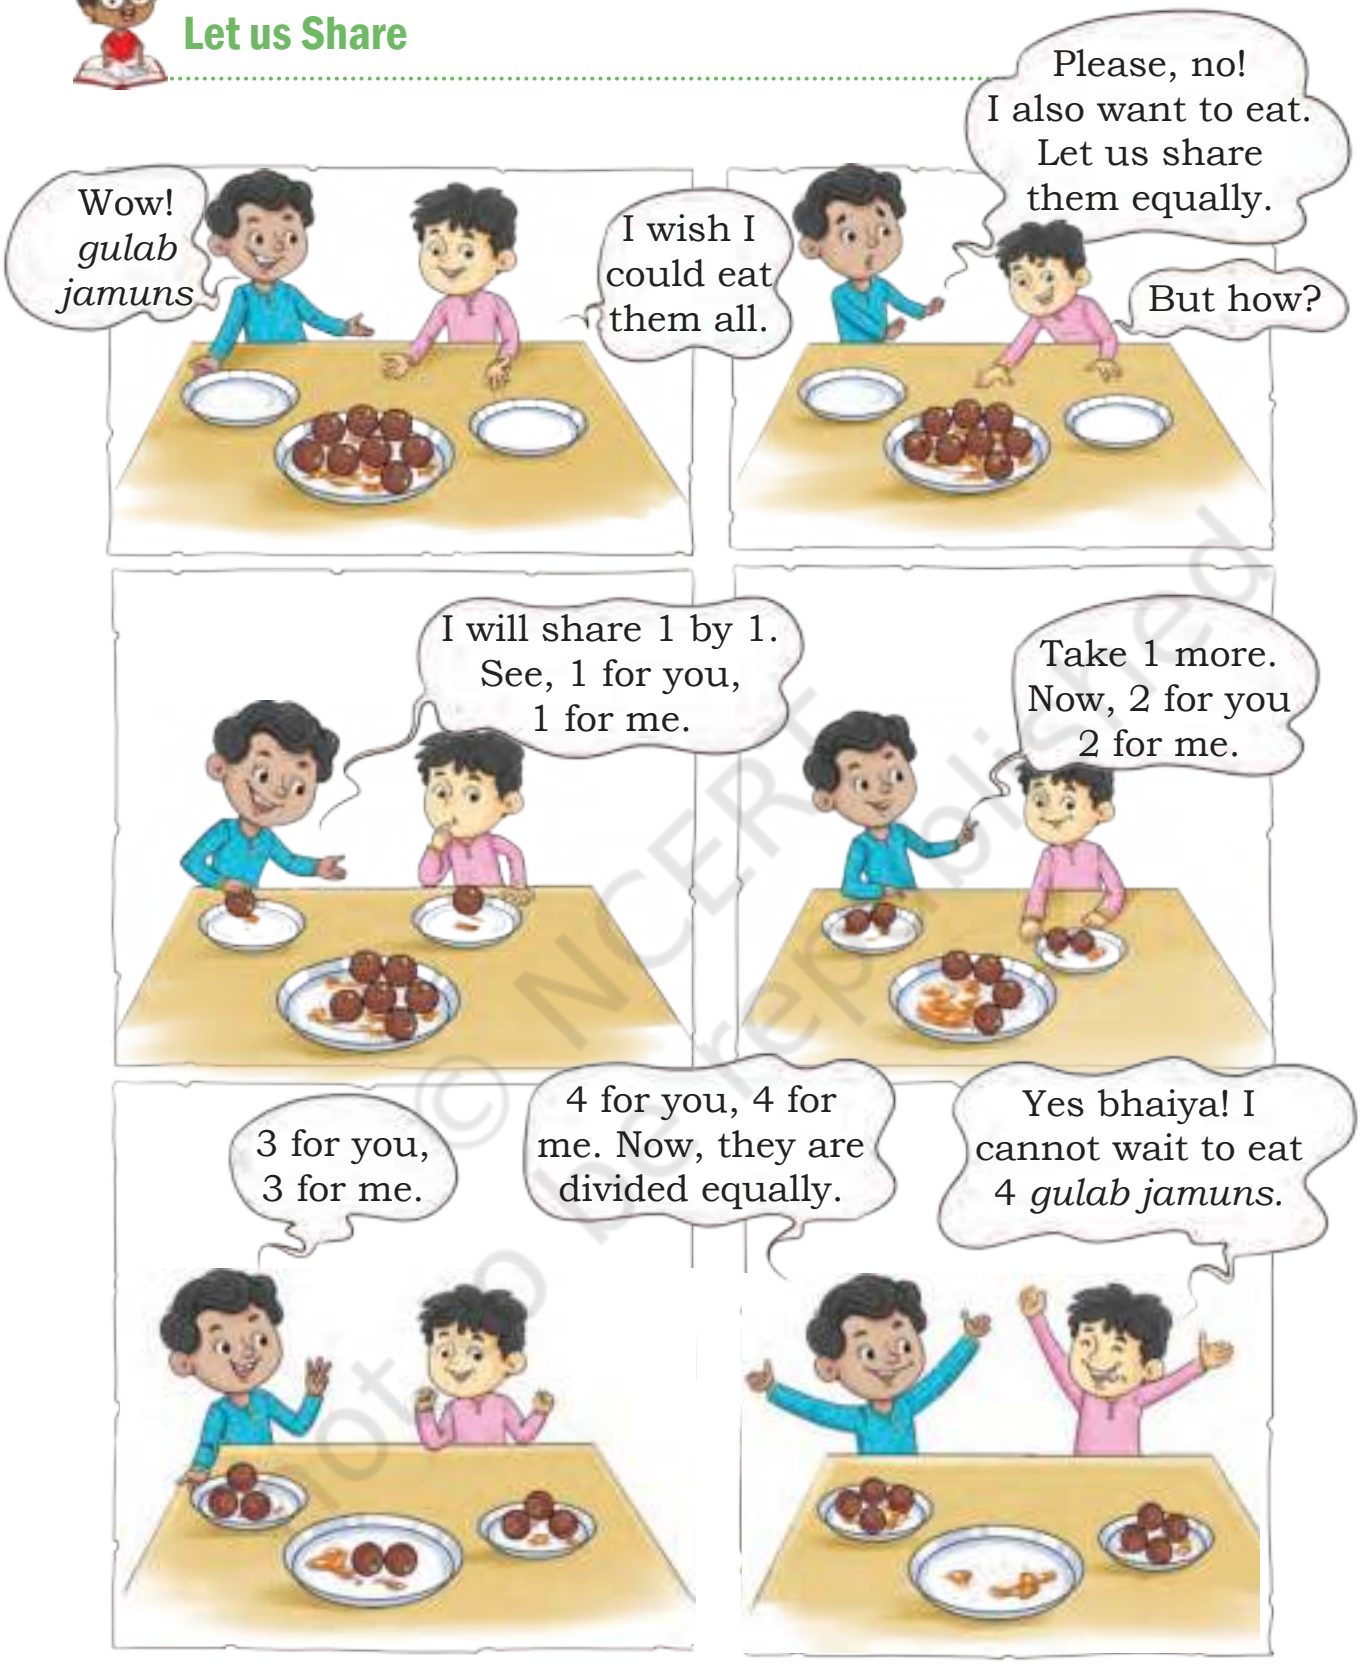
+	6	☐	☐	☐	☐	36	☐	48	☐	☐	(Table of 6)
	8	☐	☐	☐	☐	☐	☐	☐	☐	☐	(Table of 8)

Project Work

Collect 24 small objects like buttons, bottle caps, pebbles, etc. Arrange them in different arrays and write the related multiplication facts. How many of these facts can you find? Record your answers in the table given below.

Number of groups	Multiplication facts
3 groups of 4	3 × 4

Let us Share



Reprint 2024-25

A. How many *gulab jamuns* were there in total? ☐

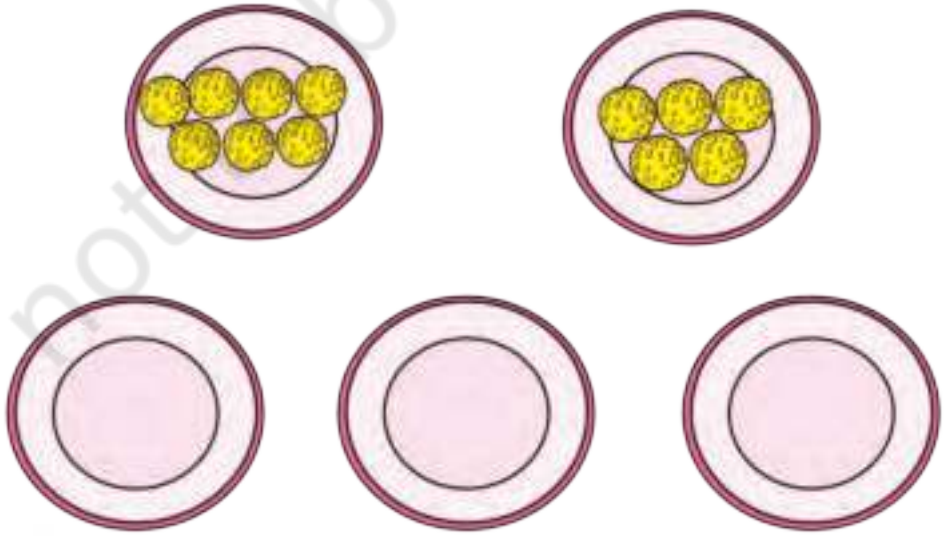
B. Have they shared equally? **Yes**/**No**

C. How many *gulab jamuns* did each of them get? ☐

Let us Do

A. Complete Ritu's art and craft project by drawing 12 *bindis* equally on 2 ice cream cones as cherries.

B. Pooja has 2 plates. Each plate has a different number of *laddoos* in it. Help her divide the *laddoos* equally in 3 plates. You can draw and colour the *laddoos*.



Reprint 2024-25

How Many Groups?

Hi, I am Garima. I have 20 star shaped beads and I will use 5 beads to make each bracelet.

Look, 1 bracelet is ready. Isn't it beautiful?

I have made 2 bracelets. Now, 10 beads are left.

Let us see how many more can we make.

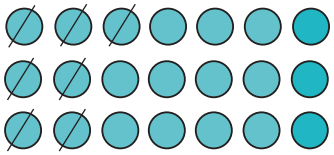
Yayy! 3 bracelets are ready.

I have used all the beads finally.

Reprint 2024-25

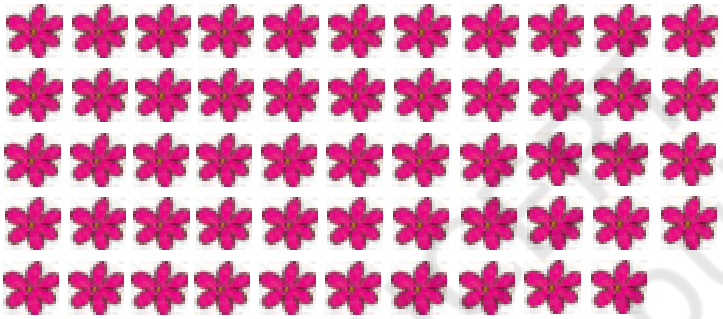
Let us Make

A. Each string has 7 beads.



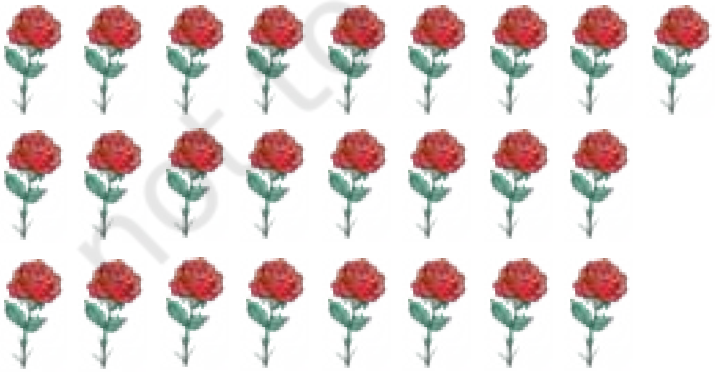
How many strings can we make with 21 beads? ☐

B. There are 54 flowers. Join 9 flowers to make 1 bracelet.



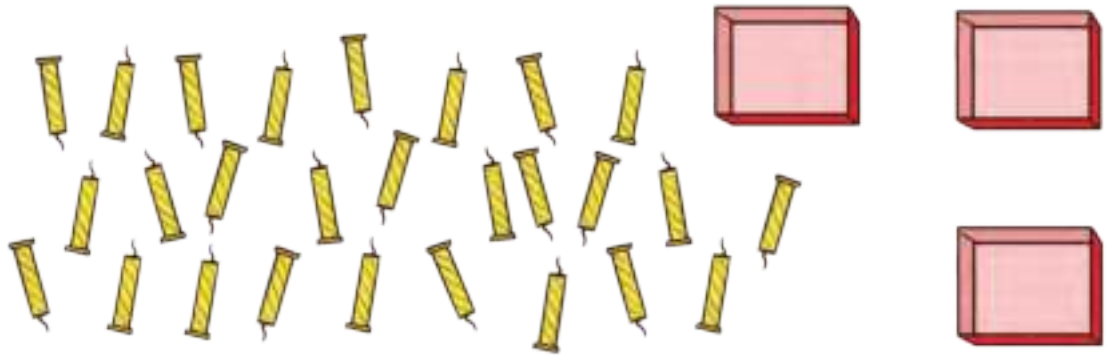
How many bracelets can we make with 54 flowers? ☐

C. There are 25 roses. 5 roses can be placed in 1 vase. How many vases are needed for placing 25 roses?



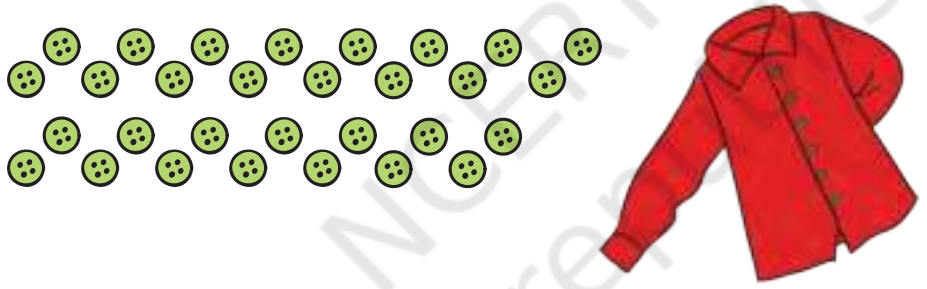
☐ vases are needed.

D. There are 27 candles. Put them equally in 3 boxes. How many candles will be in each box?



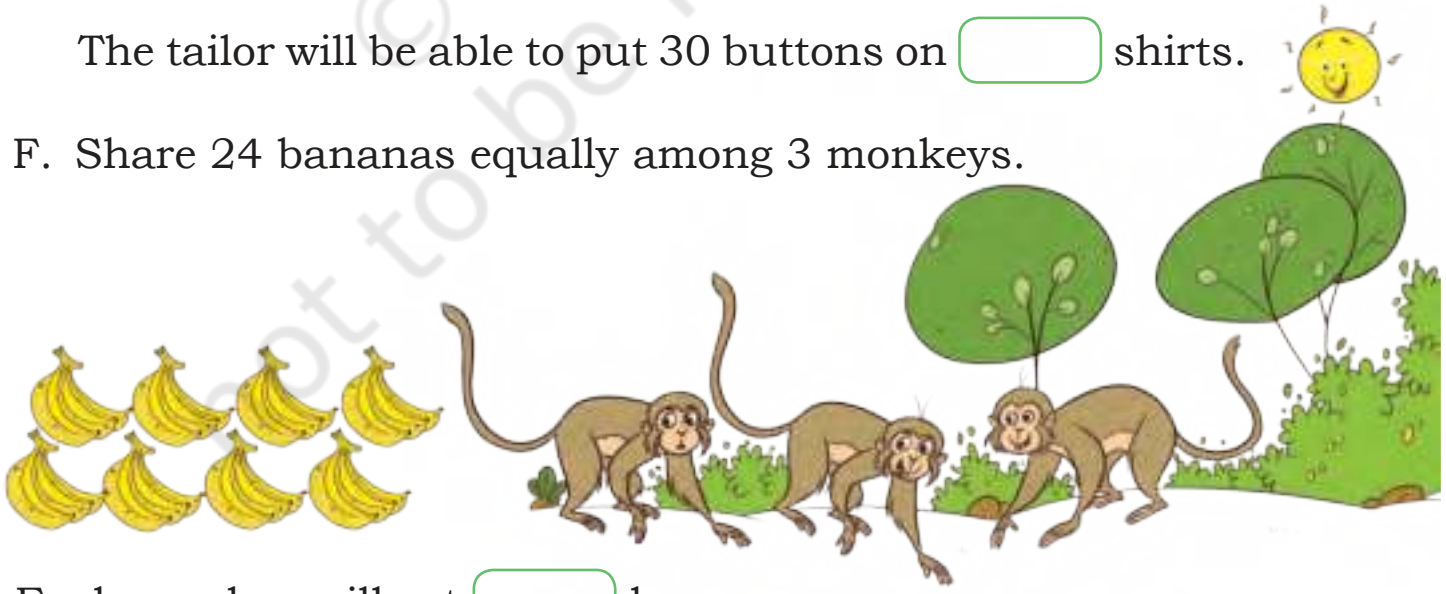
There will be ____ candles in each box.

E. A tailor puts 6 buttons on one shirt. Here are 30 buttons.



The tailor will be able to put 30 buttons on ____ shirts.

F. Share 24 bananas equally among 3 monkeys.



Each monkey will get ____ bananas.

9 Which Season is it?

Seasons

Five seasons in a year
Spring begins with
a cheer
Flowers bloom,
the birds sing
When comes
the merry spring.

Summer comes
with the shining sun
and a long day
for children to play.

Rainy season
comes with the
water drops;
Peacock dances
and the frog hops.

Leaves fall
on the ground.
Pleasant winds
on the way,
is when it is an
autumn day.

Winter is when
I'm all in snow
from head to toe.

Let us Discuss

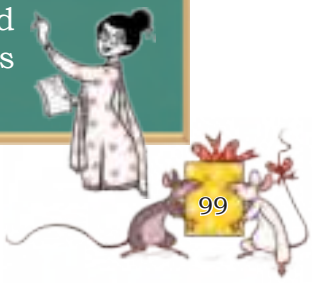
A. In which season do you go on a vacation?

B. Your birthday falls in which season of the year?

C. Which is your favourite season? Why?

D. What is special about your favourite season?

Read the poem aloud and enact. Discuss the special things that they do in different seasons. Also talk about the various locally available food and clothes, for example, *pheran* in Kashmir, etc. Also, discuss how the local variations in seasons affect the daily lives of people.



Reprint 2024-25

Match the seasons with their names and festivals.

Autumn

Dussehra,
Sharad Purnima

Summer

Guru Purnima,
Buddha Purnima
Ram Navami
Mahavir Jayanti

Spring

Gudi Padwa,
Shivratri, Baisakhi,
Holi

Winter

Lohri,
Christmas,
Republic day,
Gurunanak Jayanti
Bihu

Monsoon

Janmashtami,
Raksha Bandhan,
Independence day

Discuss the names of the seasons in Hindi, such as *Vasant, Shishir,* etc., and in other regional languages as well. Tell them about other festivals like Eid, which are not seasonal.

Reprint 2024-25

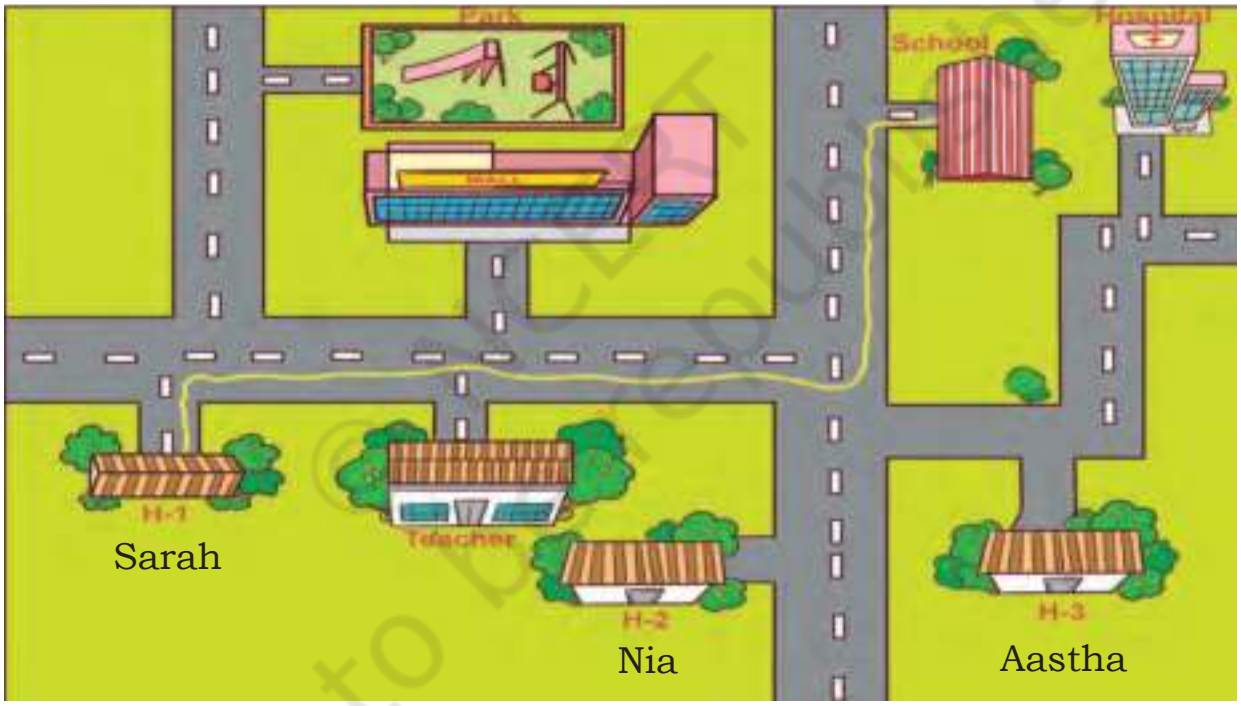
Ask a child to volunteer from the class. Blindfold him or her. Give directions to the blindfolded child to move from one spot to another (for example, move from the last bench to the blackboard). For directions use these words only— right, left, or straight.

The game will go on for 5–7 rounds with different children volunteering themselves. Ask the children to decide a safe word like 'danger' when one is about to get hit by objects in the classroom.

(To increase the difficulty level, you may change the setting of the classroom or keep harmless hurdles on the way).



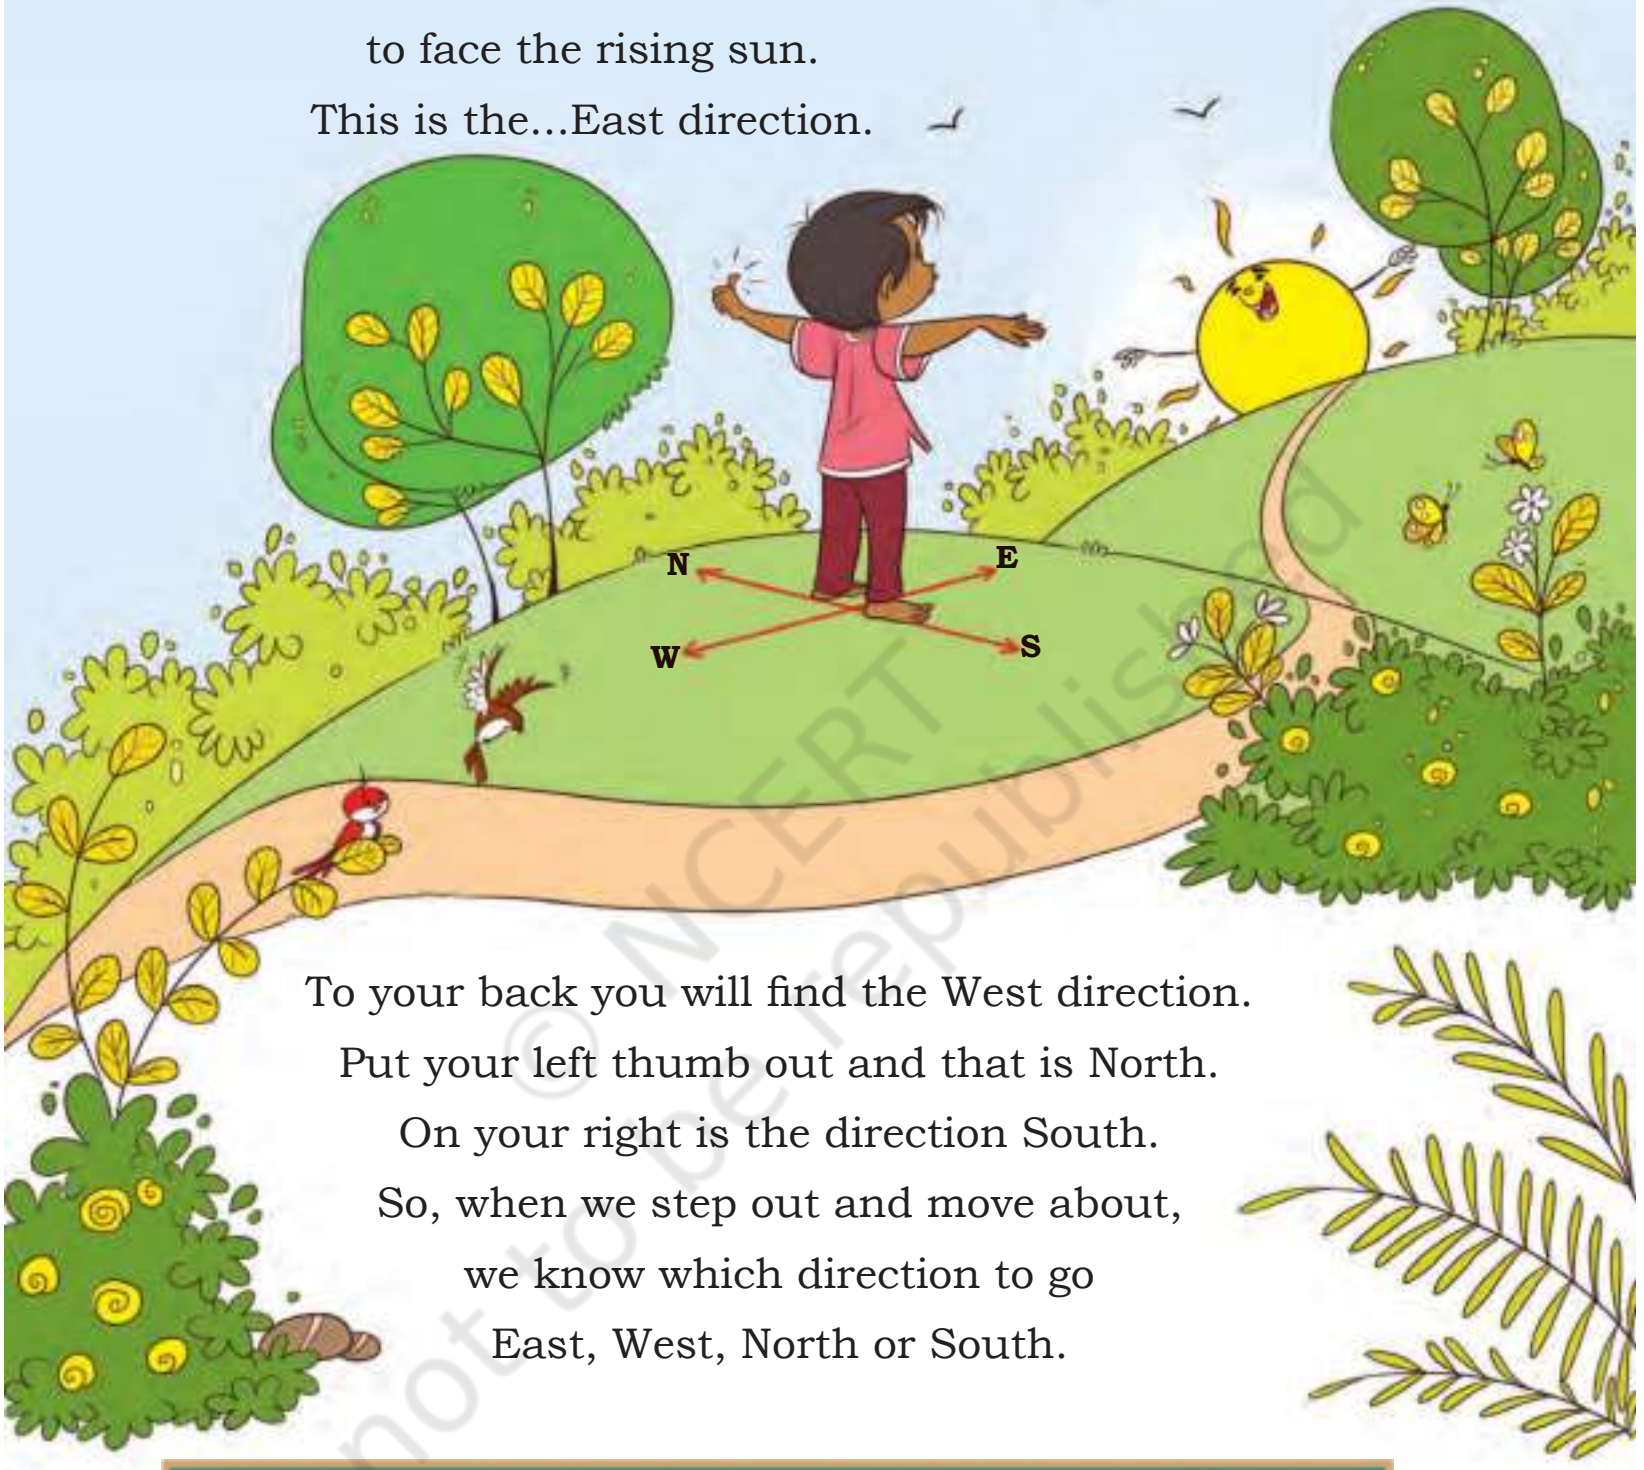
Sarah's Way to School

Green line is the path taken by Sarah to reach the school. Now draw a line with different colours to take Aastha and Nia from their home to the school.

Discuss the use of mobile apps for navigation, i.e., for locating different places.

East, West, North or South

Let us stand
to face the rising sun.
This is the...East direction.



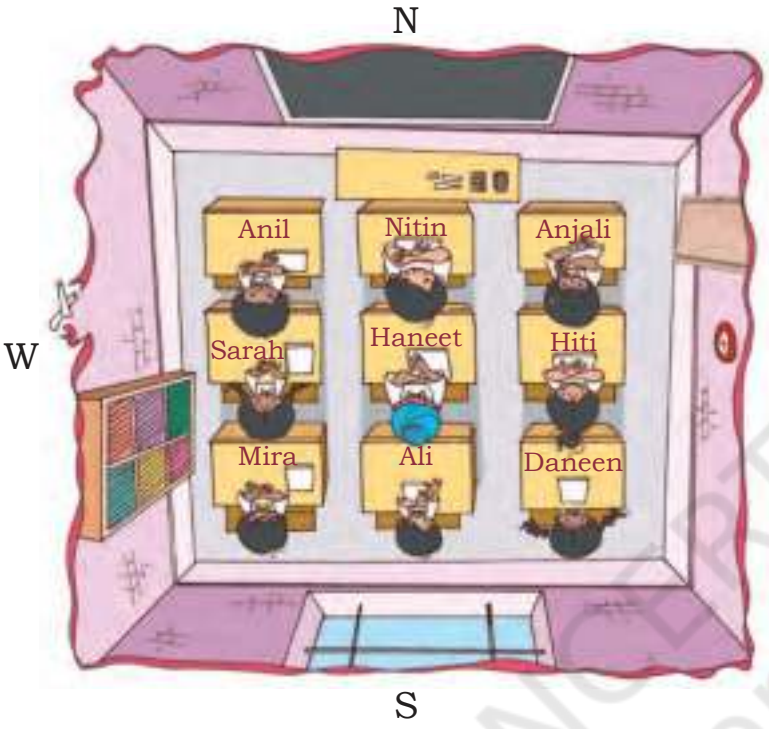
To your back you will find the West direction.
Put your left thumb out and that is North.
On your right is the direction South.
So, when we step out and move about,
we know which direction to go
East, West, North or South.

Sing the poem with actions. Help children to identify the directions. The direction must be emphasised by the teacher, and examples should be given to the children from their immediate surroundings so that they understand the spatial relevance of these words.

Reprint 2024-25

Let us Do

Look at the classroom below and answer the questions by using the words North, South, East and West (refer to the compass).



A. Haneet's desk is to the _____ of Sarah's desk.

B. Almirah is to the _____ of Ali's desk.

C. To reach the blackboard, Mira must walk towards _____ and then _____.

D. To feed the birds on the window, Nitin has to walk _____ and then _____.

Discuss the compass and its usage. Also ask the children to use a compass to find out the directions of objects from different points of reference.

Reprint 2024-25

10 Fun at the Fair

Rupal loves going to the fair. She visits the local fair with her friends. Her mother gave her ₹50. She spent most of it on her favourite rides.

Talk about the things that children enjoy in fairs, whom do they go with, what do they buy and how much money do they spend there.

How Much I Spent?

₹10

Total money spent on rides = ____

Money given by Rupal's mother	–	Money spent	=	Money left with Rupal

A friend of Rupal has ₹8 left out of ₹50. She wanted to know how much money she spent. Let us see her way of finding it.

₹8 is left with me and I have spent ₹20 on rides, which is ₹28. Then, I have spent ₹20 on snacks, which is ₹48 and I spent ₹2 more on candies, which is ₹50. Total, I have spent ₹42.

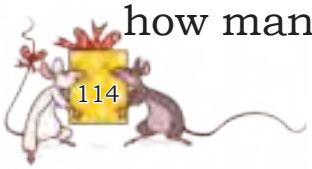
₹8 + ₹**20** = ₹28

₹28 + ₹**20** = ₹48

₹48 + ₹**2** = ₹50

₹42

If you had ₹3 left when your father gave you ₹40 for the fair, how many rupees did you spend? Find out.



Let us Do

A. How much money will be needed to buy?

Ride	Number of tickets	Money
₹20 	2	₹_____
₹10 	_____	₹30
₹15 	2	₹_____

B. We saw different notes and coins used by Rupal and her friends. Let us look at the other commonly used Indian currency.

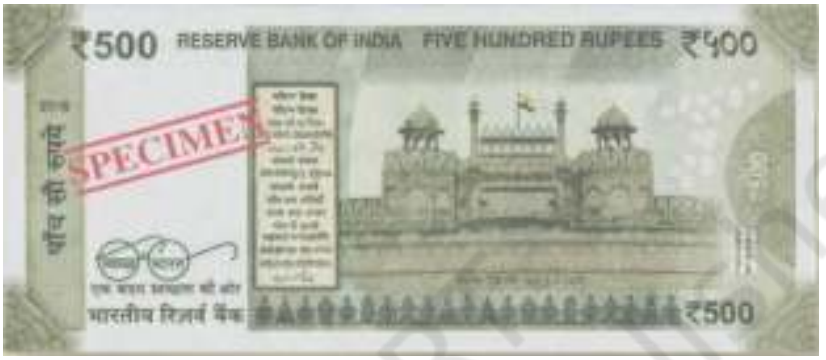
₹100

₹200

₹500

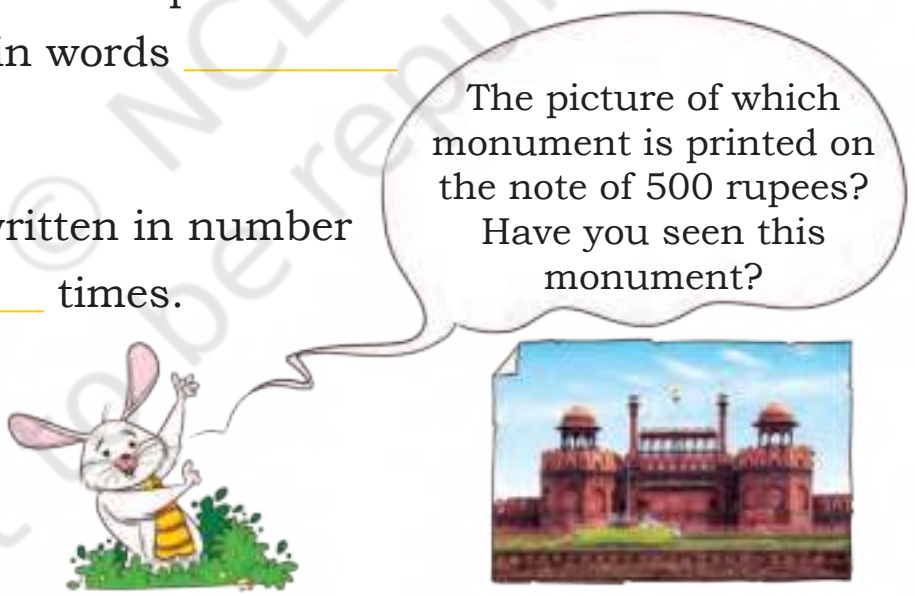
Reprint 2024-25

C. Count the number of times ₹500 is written on a ₹500 note.



i. Five hundred rupees is written in words _____ times.

ii. 500 is written in number _____ times.



Ask the children to observe other currency notes and discuss their features. Discuss with them the specifications, such as the lines on the border of the currency notes, and their number on each note for specially abled people.

Tejal's grandmother showed her some old coins that she had not seen before. Let us have a look at these coins also.

B. Meera has ₹43 with her. Kanika has ₹14 more than Meera. How much money does Kanika have?

C. A packet of bread costs ₹30 and a chocolate costs ₹60. How much money does Vivek need to buy these items?

D. Ajay has ₹58 with him. He spent ₹48 in the market. How much money is left with him now?

Project Work

Whenever you go to the market or shop with your parents, make a list of the things that you buy and the total money you spend.

Create more such contexts and ask questions whether children will add or subtract. Inculcate the value of saving money in the children through a discussion.

11 Data Handling
